Add a YouTube Video to Your Course
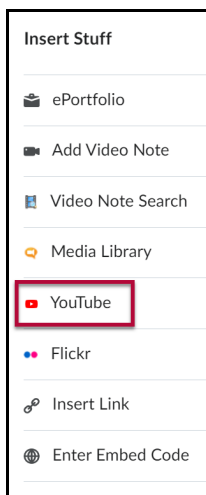

You can add a YouTube video anywhere you find the **[Insert Stuff]** icon in a WYSIWYG/HTML editor.
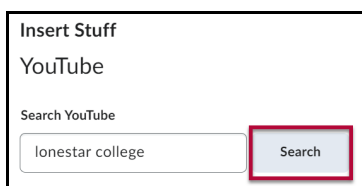

1. Inside the WYSIWYG/HTML editor (Assignment Submission, Discussion Post, Composing an Email, etc.), click on the **[Insert Stuff]** icon in the toolbar.

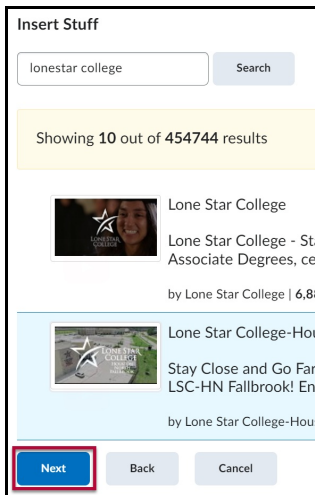

2. Select **[YouTube]** in the **Insert Stuff** window.

3. Enter either the name of the video or key search words to locate the video you wish to insert, then click **[Search]**.

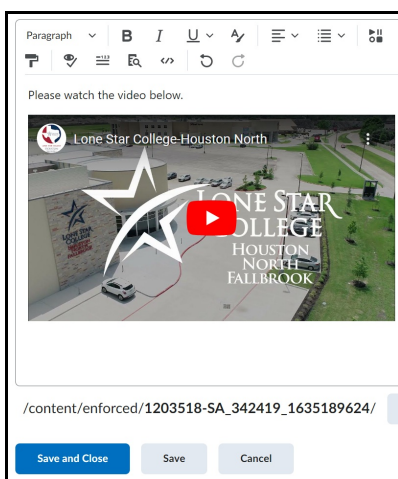

4. Select the video you wish to insert from the list and click **[Next]**.
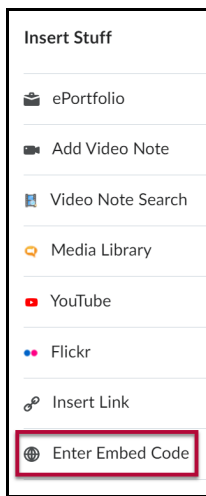

5. Click **[Insert]**.

The selected YouTube video will now appear in the WYSIWYG/HTML editor along with your text.

Some videos cannot be embedded. These videos will place a link instead.

If You Cannot Find the Video in Your Search

1. If the **[Insert Stuff]** search box does not find the YouTube video you wish to insert—go to the YouTube website, find the video, and copy its embed code.
2. Click the **[Insert Stuff]** button and click **[Enter Embed Code]** to insert the video embed code you got from the YouTube website.

Insert Stuff

- ePortfolio
- Add Video Note
- Video Note Search
- Media Library
- YouTube
- Flickr
- Insert Link
- Enter Embed Code

NOTE: You can find instructions on copying the embed code in the **Embed Video & Playlists** (https://support.google.com/youtube/answer/171780?hl=en) article.
