

# Create Sections to Organize Questions

Last Modified on 03/13/2026 4:34 pm CDT

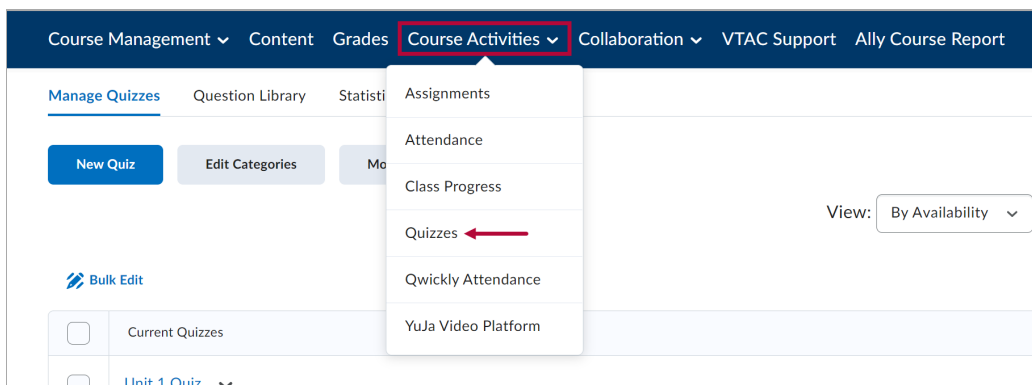

▶ Show Video Walkthrough

Instructors have the option to create sections to help organize questions. Sections are folders that contain questions, and can be created in the question library or while creating a quiz. Both pathways are similar in functionality: one creates folders within the **Question Library**, while the other creates folders within a quiz. Questions within sections may also be randomized at the folder level.

**NOTE:** Although you can create subsections within sections, we recommend you keep your question organization simple and intuitive.

## Create a Section in the Question Library

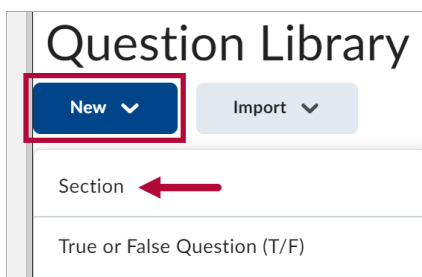

1. Go to **[Course Activities]** on the **Navbar** and click **[Quizzes]**.

2. From **Manage Quizzes**, select **[Question Library]**.

3. In the **Question Library**, click **[New]** and select **[Section]**.

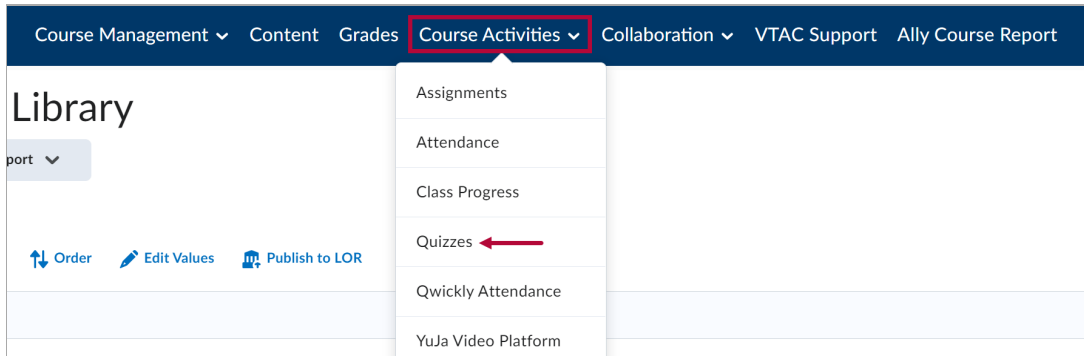

\*Proceed to **Step 5** under **Create a Section in a Quiz** for the final steps in creating

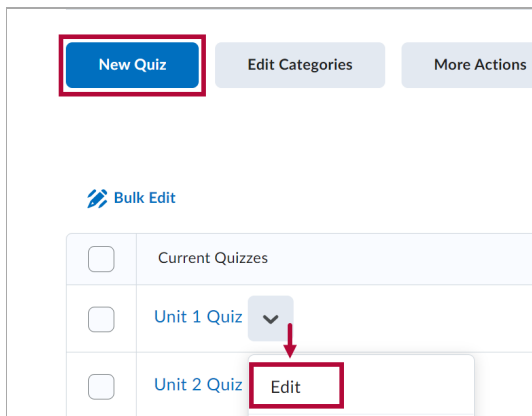

sections.

## Create a Section in a Quiz

1. Go to **[Course Activities]** from the **Navbar** and select **[Quizzes]**.

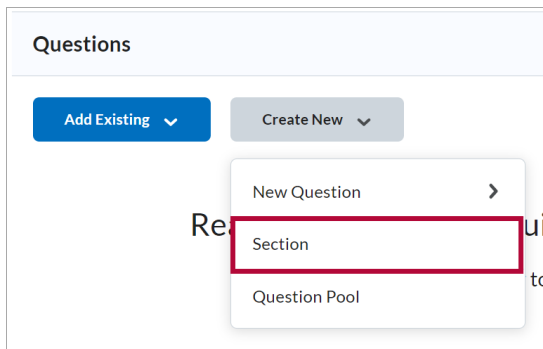

2. From the **Manage Quizzes** page, click the **[dropdown arrow]** next to the quiz you'd like to edit and select **[Edit]** or create a new quiz by selecting **[New Quiz]**.

3. Click **[Create New]** under the questions area.

A screenshot of the 'Quiz 1' configuration page. It shows fields for 'Name' (Quiz 1), 'Grade Out Of' (100 points), and 'Description'. At the bottom, under the 'Questions' section, there are two buttons: 'Add Existing' and 'Create New' (highlighted with a red box).

4. Select **[Section]** from the dropdown menu.

5. In the **New Section** window:

A) Enter a **Section Title** for the section.

B) Click **[Hide Section Title from students]** if you don't want students to see the section title.

C) Enter **Section Text** to describe or explain the section (optional).

D) Click **[Hide Section Text from learners]** if you don't want students to see the section text.

E) Click **[Shuffle questions in this section]** to ensure the questions in the section are randomized on each quiz attempt.

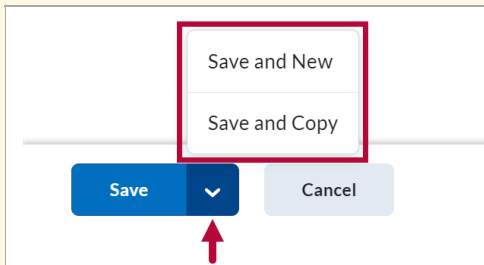

A screenshot of a "New Section" window. It contains five labeled sections: A) "Section Title \*" with an empty text input field; B) "Hide Section Title from learners" with an unchecked checkbox; C) "Section Text" with an empty text input field; D) "Hide Section Text from learners" with an unchecked checkbox; and E) "Shuffle questions in this section" with an unchecked checkbox. Below option E, there is a note: "Also shuffles sections and question pools in this section. Does not cascade to sub-sections."

6. Click **[Save]**

**NOTE:**

Click the **[down arrow]** next to **[Save]** to find two additional save options.  
Click **[Save and New]** to save the current section and begin creating a new section.  
Click **[Save and Copy]** to save and duplicate the current section.

You can also import existing sections from the **Question Library** directly into a quiz or survey. Importing sections from the Question Library into an assessment will transfer section folders and all of their associated properties (section names, section text, and settings) into the assessment.
