Software Resources for Faculty

Respondus 4.0 (<http://vtac.lonestar.edu/help/a192>) is a software tool for creating and managing exams for printing to paper or publishing directly to an online course.

Respondus LockDown Browser (<http://vtac.lonestar.edu/help/a188>) is a customized browser that increases the security of online assessments in the learning management system.

SoftChalk LessonBuilder (<http://vtac.lonestar.edu/help/a197>) is a powerful web lesson editor that lets you easily create engaging, interactive lessons for your online class.

StudyMate Campus (<http://vtac.lonestar.edu/help/a193>) makes it easy for teachers and students to create flash cards, self-assessments, and learning games – all from within D2L.

TechSmith Camtasia (<https://vtac.lonestar.edu/help/download-camtasia>) is a video recorder and editor that offers advanced, multitrack editing capabilities, including graphics, animations, and annotations.

YuJa Video Platform (<https://vtac.lonestar.edu/help/yuja>) offers several features beyond video streaming, including screen recording, machine captioning, video quizzing, and basic video editing.
