Create a Group Assignment

Last Modified on 04/12/2021 7:02 am CDT

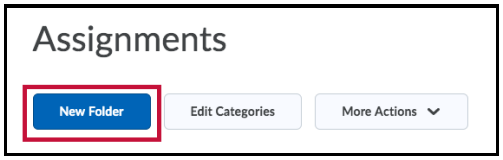
You may want to create an assignment that allows a group of students to turn in a single submission. This allows you to assign a single grade to the students in the group automatically, and any of the students are able to turn in the submission. You can do this by creating a Group Assignment. To do this, you must set up a group category with groups first. (See Create Groups (https://vtac.lonestar.edu/help/a062).)

You can create the assignment in the Groups area when you create the groups. Creating an assignment folder then creates a folder for each of the groups in the category. From there, the settings are the same as individual assignments. (See Create Assignments and Categories (https://vtac.lonestar.edu/help/a032) for further instructions on assignment settings.)

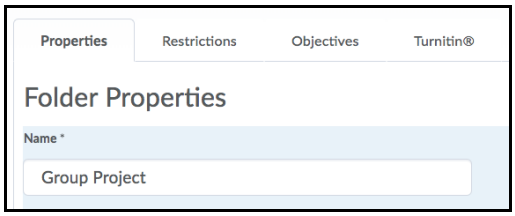
If you did not create a group assignment folder when you were creating groups, you can still create one at any time.

Create an Assignment After the Groups Have Been Created

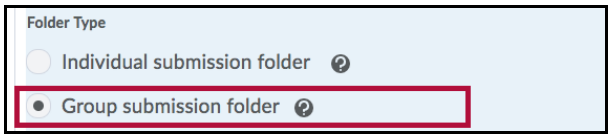
1. Go to the **Course Activities** menu in the navbar, then choose **Assignments.**
2. Click the **New Folder** button.



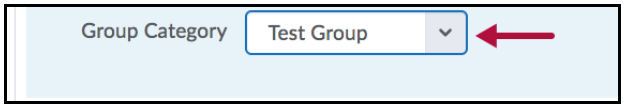
3. Enter a name for the group assignment folder.



4. Select the **Group submission folder** option.



5. Choose the Group Category (the category that you created previously in Groups).



6. See Create Assignments and Categories (https://vtac.lonestar.edu/help/a032) for further instructions on assignment settings.
