Evaluate ePortfolio Items in Assignments

ePortfolio items that students submit to an assignment folder are treated as unique objects; they do not change when the original item changes. This allows faculty to assess submissions without worrying about students revising their work.

- ePortfolio items will appear similar to other items, but with ".d2lresource" appended to the end.

- ePortfolio items are assessed with the same methods used with any other content.
    - See "Evaluate Assignment Submissions (https://vtac.lonestar.edu/help/a038)"
