# Create a Link

Last Modified on 08/29/2025 11:11 am CDT

Once you have created a module or sub-module in your table of contents, you can add links to websites in that module.
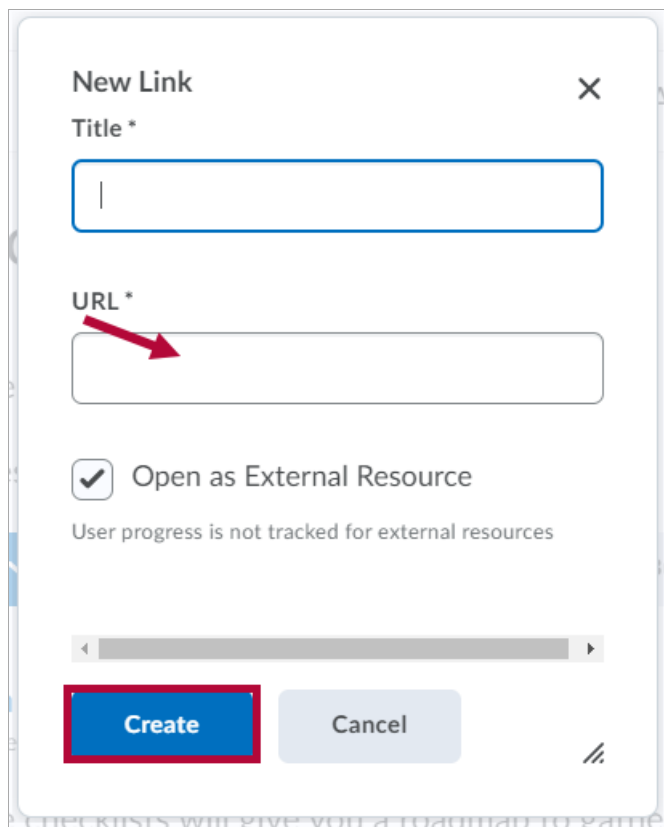

Show Video Walkthrough

Create a Link

1. Click the module in the **Table of Contents** on the left.

2. Click on the **[New]** button.

3. Choose the **[Create a Link]** option.

4. Enter a title and the **URL** (web address) in the appropriate fields.

5. The box labeled **[Open as External Resource]** is automatically selected as many links must open in a new window so to be safe leave checked.

6. When finished, click the **[Create]** button.
