

Add and Edit Quiz Questions

Last Modified on 03/20/2026 11:48 am CDT

NOTE: The following question types now automatically filters out JavaScript and non-standard HTML: **Likert, Ordering, Matching, Fill in the Blanks, Short Answer, Multi-Short Answer, Arithmetic, and Significant Figures**. For existing questions containing JavaScript and non-standard HTML, the questions continue to display as intended until an instructor edits and saves the questions, which removes the JavaScript and non-standard HTML. D2L recommends reviewing all question types containing JavaScript and non-standard HTML and modifying as needed, ensuring that the questions display as intended for learners.

To get questions added to your quiz, you can create new questions within a quiz or import questions from the Question Library. The most effective practice is to create questions in the Question Library. (See [Use the Question Library \(https://vtac.lonestar.edu/help/use-the-question-library\)](https://vtac.lonestar.edu/help/use-the-question-library) to do this.) Organizing your Question Library Sections into chapters, modules, or topics will help you create **Question Pools** (a randomized set of questions) and **Quiz Sections** (allowing randomized question order within the section).

Question Pools

If you would like your students to be served a randomized set of questions from a bigger collection (for example, each student gets 10 random questions from a pool of 30), you need to create a question pool. See [Create a Question Pool \(https://vtac.lonestar.edu/help/create-question-pool\)](https://vtac.lonestar.edu/help/create-question-pool).

Randomize Quiz Questions

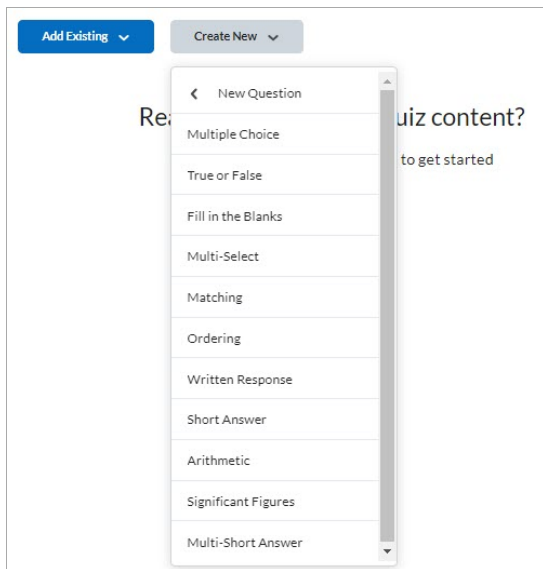

To randomize the questions on your quiz, you have the option to shuffle the quiz at the quiz level. You can also randomize quizzes within a section. See [Randomize Quiz Questions \(https://vtac.lonestar.edu/help/randomize-quiz-questions\)](https://vtac.lonestar.edu/help/randomize-quiz-questions).

Add Quiz Questions

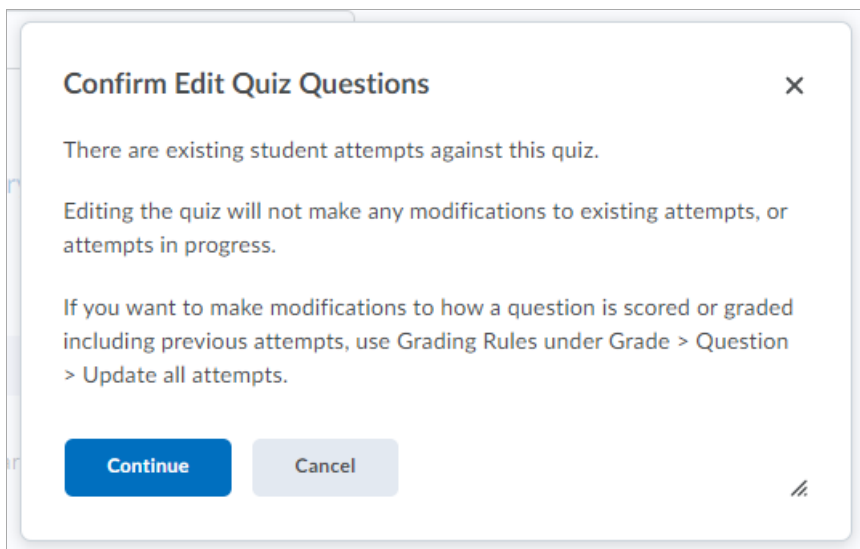

- On the **Edit Quiz** page, click **[Create New]** and then select **[New Question]**.

- Select the **Question Type**.

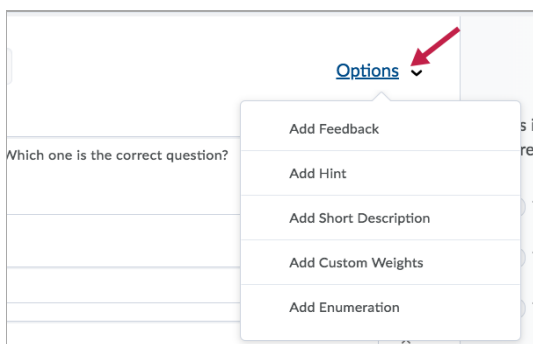

- If the quiz has existing student attempts, you will be asked to confirm your edits. You should grade all attempts before editing the quiz. The edits will not become part of the quiz until it is reset or copied to another course.

- Complete the options for your question type.

- Enter the question text. When you put your cursor into the text box, a toolbar will pop up on the right side of the text box.
 - Enter your question answers. If you need more answer possibilities, click **[Add Answer]**.
 - Click the circle next to the correct answer.
 - Click the text box next to the **[Randomize answers for each student]** checkbox if you would like the answers to the question randomized each time the question is displayed.
 - Enter the number of points you want the question to be worth (this can always be changed on the quiz).
 - You can see a preview of the question on the right of your screen.
 - Click the **[Save]** to save your question and return to the **Add/Edit Questions** screen.
- There are some advanced options that you can select from the **[Options]** dropdown above the Question Text box.

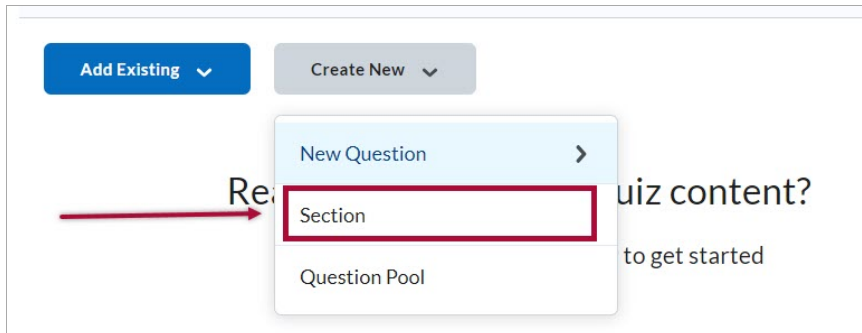

- **[Add Feedback]** will allow you to add feedback for each answer, and for the question overall.
- **[Add Hint]** will allow you to add a hint for the question.
- **[Add Short Description]** allows you to add a title description to the question.
- **[Add Custom Weights]** will allow you to give students weighted credit for each answer.

- **[Add Enumeration]** will allow you to add your desired enumeration to the answer choices.

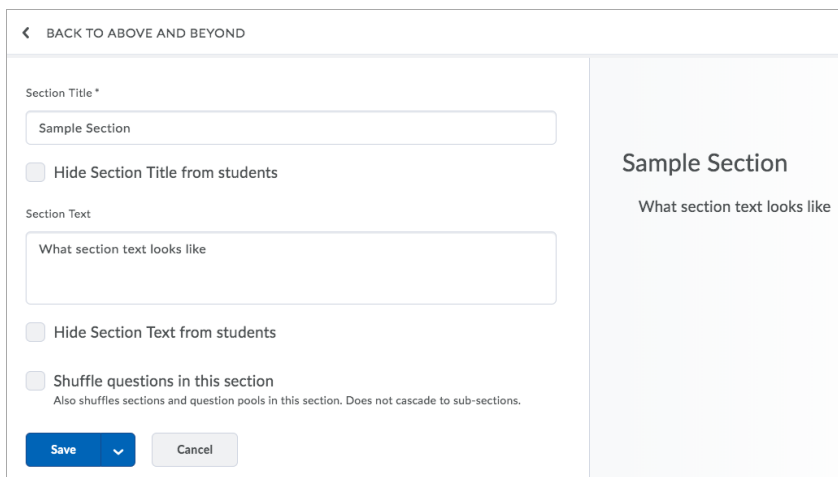

Create a New Section

NOTE: Sections are OPTIONAL, however they are very useful if you want to shuffle questions within a section (Ex: you can create a section for each chapter in your Final Exam), or if you wish to separate different question types.

1. Click on **[Create New]** and choose **[Section]**.

2. Complete the section fields. You can choose to **[Hide Section Title from students]** on this screen, you can also choose to **[Shuffle questions in this section]**. You will see a preview of what the section header will look like on the right side of your screen.

A screenshot of a form titled 'BACK TO ABOVE AND BEYOND'. The form has two columns. The left column contains: a 'Section Title' field with 'Sample Section' entered; a checkbox for 'Hide Section Title from students' (unchecked); a 'Section Text' field with 'What section text looks like' entered; a checkbox for 'Hide Section Text from students' (unchecked); a checkbox for 'Shuffle questions in this section' (unchecked) with a sub-note: 'Also shuffles sections and question pools in this section. Does not cascade to sub-sections.'; and 'Save' and 'Cancel' buttons. The right column is a preview area showing 'Sample Section' and 'What section text looks like'.

3. Click **[Save]** to save your section, and you will be returned to the **Add/Edit Questions** screen for your quiz.

Create a Question Pool

1. Click **[Create New]** and choose **[Question Pool]**.

2. Fill in the title of the **Question Pool**, enter the number of questions to select on each quiz, and how many points you want each question to be worth.

A screenshot of a form for creating a 'Question Pool'. The form has the following fields and buttons:

- 'Question Pool Title *' with a text input field containing 'A Test Question Pool'.
- 'Number of Questions to Select *' with a numeric input field set to '10' and the text 'from 0'.
- 'Points per Question *' with a numeric input field set to '1'.
- A 'Browse Question Library' button, which is highlighted with a red rectangular border.
- 'Save' and 'Cancel' buttons at the bottom.

3. Click [**Browse Question Library**] to add questions to the **Question Pool**.
4. Choose the questions you would like to add to your **Question Pool**, then click [**Add**].

A screenshot of the 'Browse Question Library' interface. It features a search bar at the top with the placeholder text 'Search question text...'. Below the search bar, it shows '25 questions selected'. There are two expandable sections: 'Publisher Test Bank' (collapsed) and 'WB Chapter 7' (expanded). Under 'WB Chapter 7', there are five questions, each with a checked checkbox and a note 'Also in: Example Quiz'. A red arrow points from the first question down to the 'Add' button at the bottom left, which is highlighted with a red rectangular border. A 'Cancel' button is also visible at the bottom.

5. It is possible to add questions from other quizzes to the question pool. On the **[Source: Question Library]** field choose the desired quiz from the dropdown menu and select the desired questions.

6. When you return to the question pool screen, make sure all the options are filled in and then click **[Save]**.

Importing Quiz Questions

1. Click **[Add Existing]** on the **Edit Quiz** page.
2. Choose from the following selections: **[Upload a File]**, **[Browse Question Library]** or **[Import from Learning Repository]**.

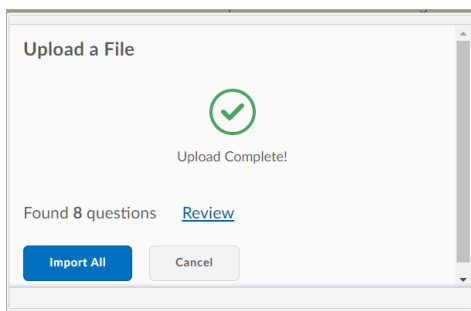

Import Questions by Uploading a File

NOTE: The **Import Zipped Content** procedure described in the [link](https://vtac.lonestar.edu/help/a118) (<https://vtac.lonestar.edu/help/a118>) is a preferred method of importing zip files.

1. Click **[Add Existing]** and select **[Upload a File]**.
2. Click **[Browse Files]** or drag and drop the file in the drop zone. This option supports importing ZIP files or specifically formatted CSV files.

3. Once the file has been successfully uploaded, you will see a green checkmark.

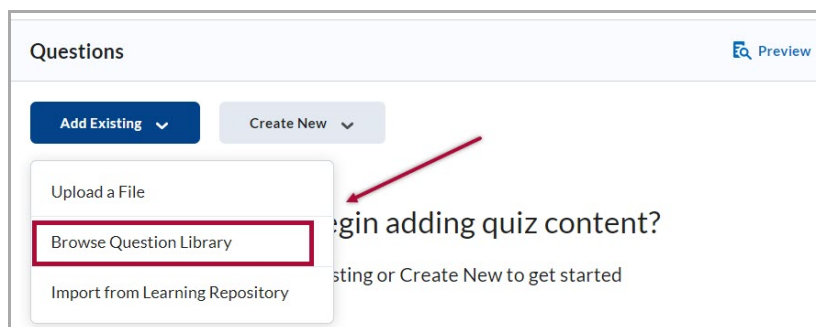

4. Click **[Import All]**, or click **[Review]** to individually select questions to import.

NOTE: For individualized help with importing or creating questions, contact your local **Online Services** representative. See [Meet Your Online Services Representative \(http://vtac.lonestar.edu/help/a109\)](http://vtac.lonestar.edu/help/a109) for contact information.

Import Questions by Browsing the Question Library

1. Click **[Add Existing]** and select **[Browse Question Library]**.

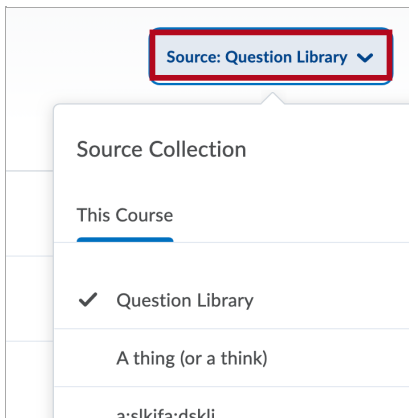

NOTE: When you import questions from the **Question Library**, your quiz will contain a copy of the questions, not the original questions.

2. Select the quiz questions to include in the import and click **[Import]** to place the questions at the bottom of the quiz. You can also click the arrow beside Import to select where the questions will be added.

3. You can also import questions from other quizzes or surveys in the course. In the **[Source:Question Library]** drop-down list, select the source where the existing questions reside.

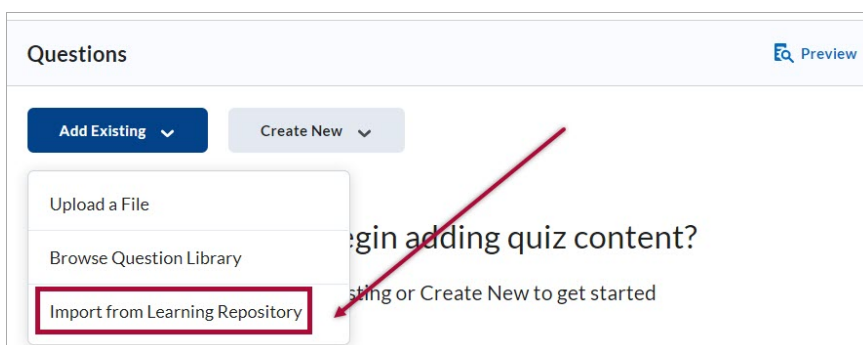

4. In the Source **[Filter]** dropdown list, choose **[Filter by]** and check the box next to the type of questions you would like to import (e.g., **True or False**, **Multiple Choice**, **Matching**, **Short Answer** or **Multi-Select**).
5. In the **Sort** dropdown list, select the option you want to sort by.

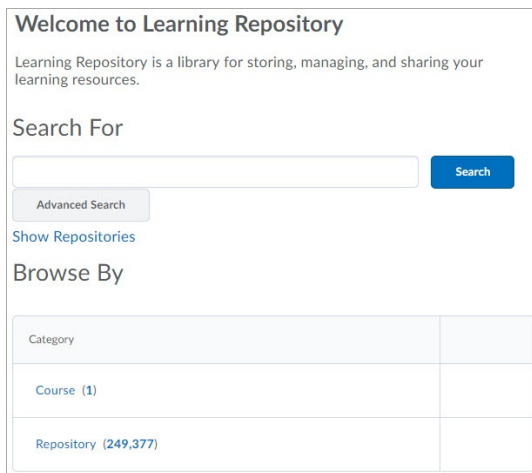

6. Select the questions you want to import, then click **[Add]**.

Import Questions from Learning Repository

1. Click **[Add Existing]** and select **[Import from Learning Repository]**.

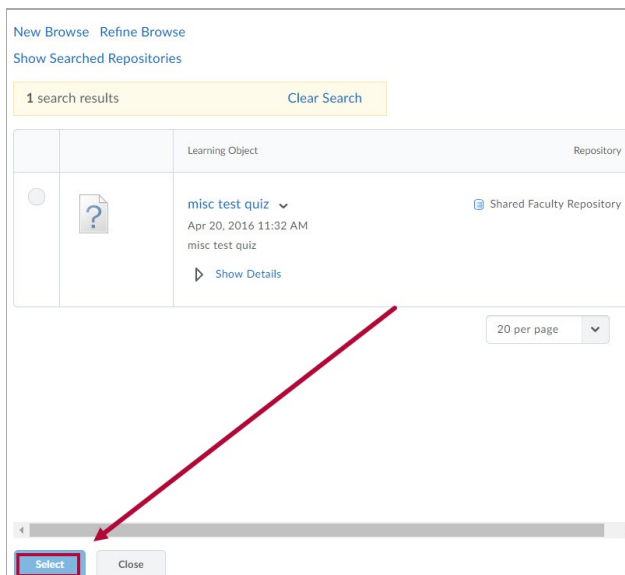

2. Search the online repository for questions to import.

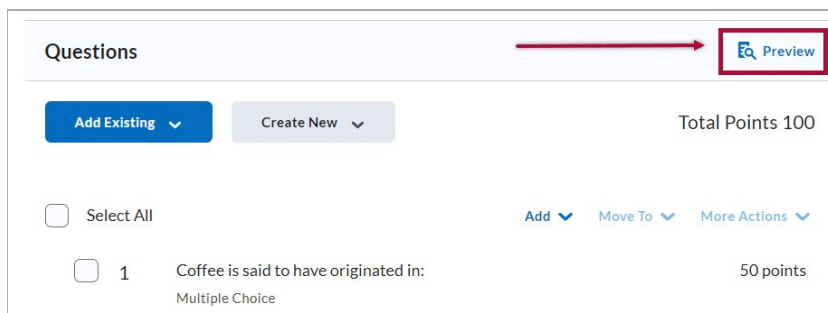

3. Select a quiz under **Category**.

4. Click **[Select]** to import from **Question Library**.

Preview the Quiz from Add/Edit Questions

To preview the quiz, click on **[Preview]** on the quiz editing page. The quiz preview will open in a new browser tab.

NOTE: The following question types now automatically filters out JavaScript and non-standard HTML: **Likert, Ordering, Matching, Fill in the Blanks, Short Answer, Multi-Short Answer, Arithmetic, and Significant Figures.** For existing questions containing JavaScript and non-standard HTML, the questions continue to display as intended until an instructor edits and saves the questions, which removes the JavaScript and non-standard HTML.

D2L recommends reviewing all question types containing JavaScript and non-standard HTML and modifying as needed, ensuring that the questions display as intended for learners.

Toggle a Quiz Question as Bonus

1. Go to the **[Course Activities]** menu in the navbar and select **[Quizzes]**.
2. On the **Manage Quizzes** page, click the title of the quiz.
3. Select the questions you want to set as bonus, then click **[More Actions]** and select **[Toggle Bonus]**.

The screenshot shows the 'Questions' management interface. At the top, there are buttons for 'Add Existing' and 'Create New', and a 'Preview' link. Below these, it says 'Total Points 3'. A list of three questions is shown, with the second question selected. A 'More Actions' dropdown menu is open, showing options: 'Delete', 'Toggle Bonus', 'Toggle Mandatory', 'Set Points', and 'Publish to the LOR'. Red circles and boxes highlight the selection process: circle 1 on the question checkbox, circle 2 on the 'More Actions' button, and circle 3 on the 'Toggle Bonus' option.

4. The label **BONUS** will appear under the question points.

The screenshot shows the 'Questions' management interface after the action. The second question is now marked as a bonus. The '1 point' label is replaced by '1 point BONUS'. A red arrow points to the 'BONUS' label, which is enclosed in a red box.

NOTE: Randomly drawn questions from a Question Pool **cannot be marked as bonus.** The bonus value is equal to the points value assigned to the quiz question.

Toggle a Quiz Question as Mandatory

1. Go to the **[Course Activities]** menu in the navbar and select **[Quizzes]**.
2. On the **Manage Quizzes** page, click the title of the quiz.
3. Select the questions you want to set as mandatory, click **[More Actions]** then select **[Toggle Mandatory]**.

The screenshot shows a 'Questions' interface with a search bar and 'Preview' link. Below are buttons for 'Add Existing' and 'Create New'. A 'Total Points 3' indicator is present. A list of three questions is shown, with the second question selected. A 'More Actions' dropdown menu is open, showing options: 'Delete', 'Toggle Bonus', 'Toggle Mandatory', 'Set Points', and 'Publish to the LOR'. Red circles and boxes highlight the selection process: 1. Selecting the second question, 2. Clicking 'More Actions', and 3. Clicking 'Toggle Mandatory'.

4. The label **Mandatory** will appear below the listed question.

The screenshot shows the same list of three questions. The second question is now highlighted in blue and has a 'Mandatory' label next to it, indicated by a red box and an arrow.

Attach a Rubric to Written Response Question

1. Go to the **[Course Activities]** menu in the navbar and select **[Quizzes]**.
2. On the **Manage Quizzes** page, click the title of the quiz.
3. Select the **Written Response** question for which you want to attach a rubric.

The screenshot shows a 'Questions' interface with a 'Select All' button and 'Add', 'Move To', and 'More Actions' dropdowns. A list of three questions is shown, with the third question selected. A red arrow points to the 'Written Response' label next to the third question, which is highlighted in blue.

4. Select **[Add Rubric]** and choose between two options:

- A. Select **[Create New]** to create a new rubric.
 - B. Select **[Add Existing]** to choose one of your previously created rubrics.
- In this example, we will select **Add Existing**

The screenshot shows a question editor interface. At the top, there is a text box containing the question: "How did the cultivation of coffee in the Americas contribute to the development of colonial economies and global trade networks in the 18th and 19th centuries?". Below the question, there are two checkboxes: "Enable HTML Editor for learner responses" and "Allow learners to insert images and add attachments", both of which are unchecked. Underneath, there is a "Points" field with the value "5". To the right of the points field is a dropdown menu labeled "Add Rubric". This dropdown menu is open, showing two options: "A Create New" and "B Add Existing". The "Add Existing" option is highlighted with a red circle and a red arrow pointing to it.

5. Select the Rubric you want to add and select **[Add Selected]**.

NOTE: Only Published rubrics will appear as choices. If you do not see the rubric you wish to add, you may have to set the rubric to **Published**

The screenshot shows a dialog box titled "Add Existing" with a close button (X) in the top right corner. At the top of the dialog is a search bar with the placeholder text "Search" and a magnifying glass icon. Below the search bar, there is a list of three rubric options, each with an unchecked checkbox and a magnifying glass icon to its right: "Essay Rubric", "Essay Rubric 2", and "Written Response". The "Written Response" option is highlighted with a red border, and a red arrow points from this option down to the "Add Selected" button at the bottom of the dialog. The "Add Selected" button is highlighted with a red border, and a "Cancel" button is located to its right.

6. The Rubric you added will display under Rubrics. Select **[Save]** when finished.

Question Text *

How did the cultivation of coffee in the Americas contribute to the development of colonial economies and global trade networks in the 18th and 19th centuries?

Enable HTML Editor for learner responses

Allow learners to insert images and add attachments
