Add Pearson (LTI 1.3) MyLab and Mastering, or Revel to Your D2L Course

Last Modified on 08/26/2026 5:03 pm CDT

These instructions include tutorial videos from Pearson. It is *highly recommended* that you read the steps and watch the videos before performing them.

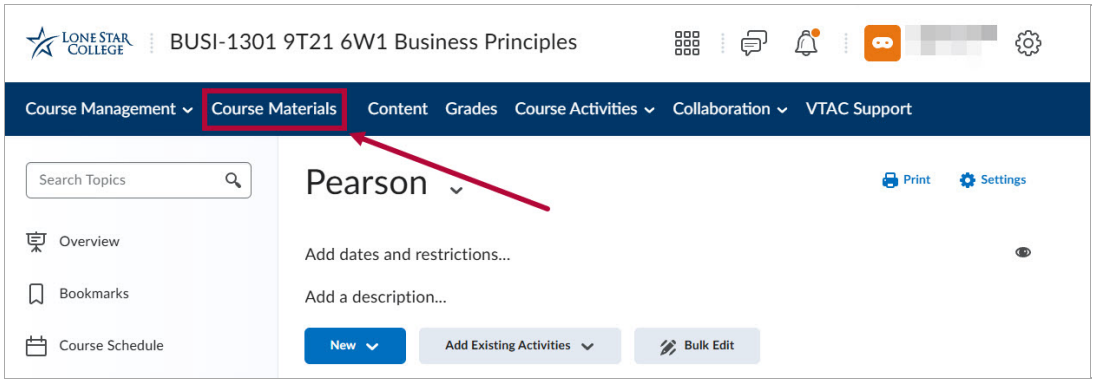

Online Services does not have access to your **Pearson** account. For integration issues or questions, please contact your **Pearson representative.**

- **Link: Schedule Time for Course Setup** (https://support.pearson.com/getsupport/s/facultysupportscheduler?language=en_US)
- **Watch the Star Bundle (VitalSource) & Pearson Open Lab** (https://vimeo.com/1154387603/760a665ea7)

It is required for all Faculty to add a **Pearson 1.3 LTI** link to a **Content** module, as this link is **required** for students who **Opt Out** of the **STAR Bundle** to access Pearson. Click here to view the instructions for adding a **Pearson 1.3 LTI** link.

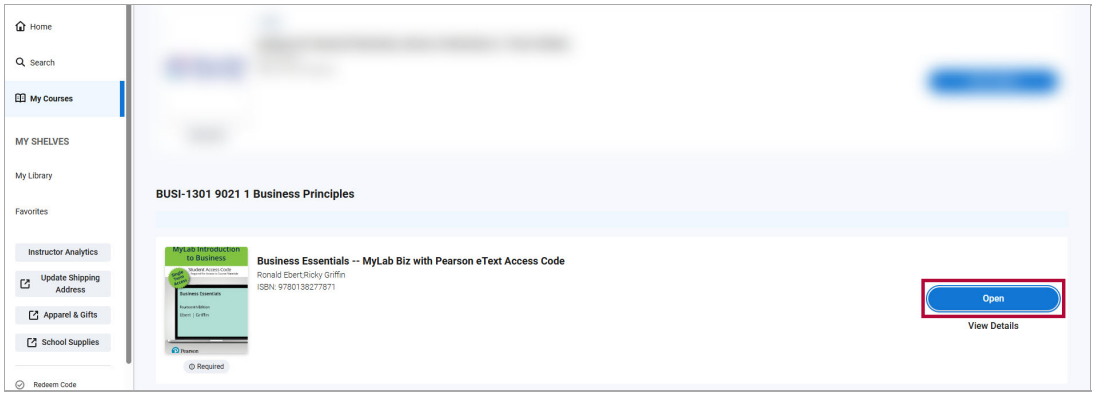

Accessing Pearson from Course Materials in D2L

1. In your D2L course, select **[Course Materials]** from the Navbar. The **Course Materials Dashboard** will open in a new browser tab.

2. In the **Course Materials Dashboard**, click **[My Courses]** to display the Course Materials. Identify the **Pearson eText** associated with your course—the eBook will be listed under the course materials for the current term. Click the **[Open]** button next to the **eText** associated with your course to launch the tool.

   NOTE: The **Course Materials Dashboard** displays all the materials for the current term. Please make sure you are choosing the course materials for the correct course before clicking the **[Open]** button.

NOTE: If prompted, sign in with your Pearson credentials to complete the access process.

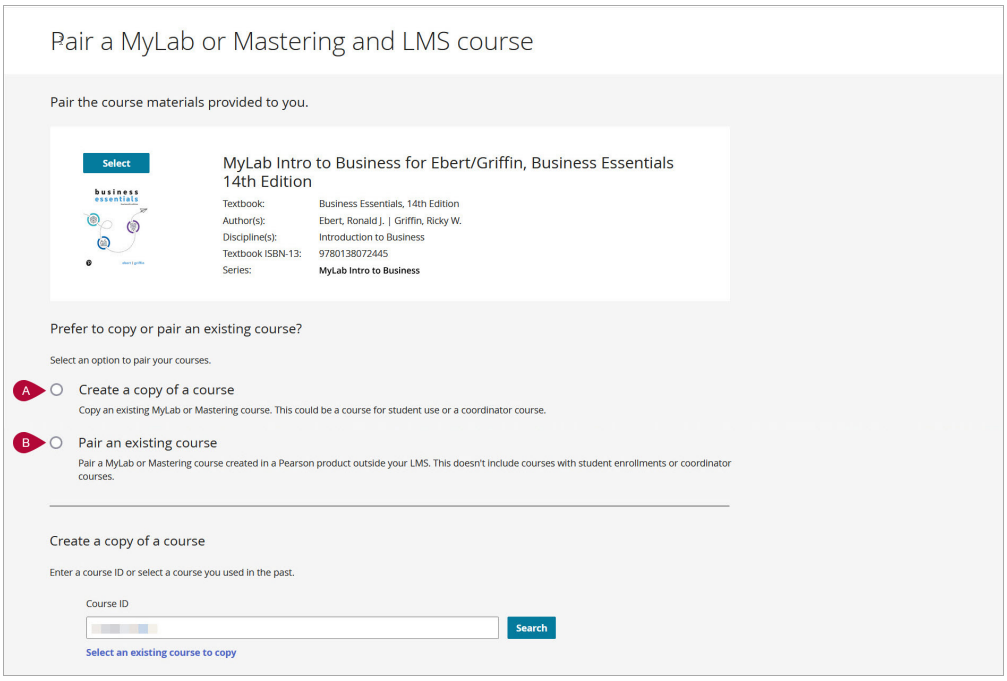

Pairing Pearson LTI 1.3 to a D2L Course

1. The first time you follow the above steps, you will need to pair your Pearson integration with D2L. You will be taken to a screen where you will be given two options for pairing:

   A. **Create a copy of a course**: Copy an existing course, such as a course from a previous semester, or a Pearson coordinator course (the Pearson equivalent of a D2L Sandbox).

   B. **Pair an existing course:** For example, it is possible to select a course from a previous semester.

   NOTE: It is not possible to create a course on Pearson's portal first, *then* linking it to your D2L course from Pearson's portal. Instead, you can copy content from an existing Pearson course during this step of the process, and a new course will be automatically created at Pearson's portal.

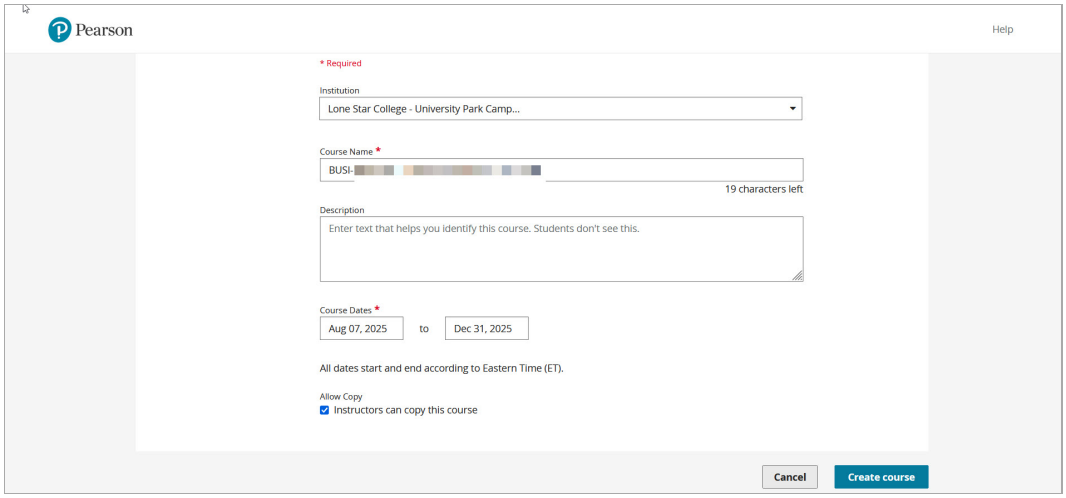

2. Search for your course and click **[Select]**.

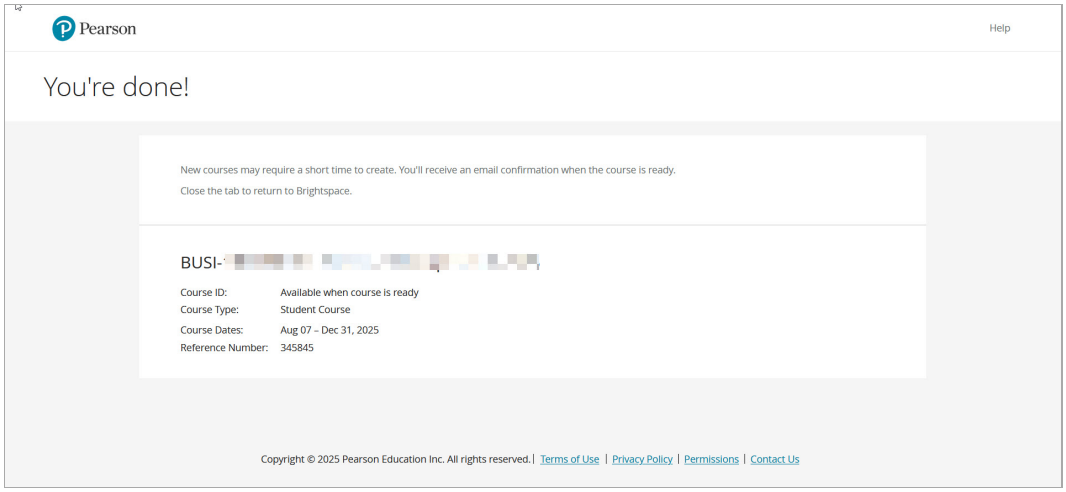

3. Fill out the form for your course and click **[Create Course]**.

4. Close your browser tab or window. You will receive an email when your course is ready.

> **NOTE:** Adding direct links to Pearson assignments in your D2L course content is optional. Students can still access Pearson activities through the **[Course Materials]** link in the **Navbar**.

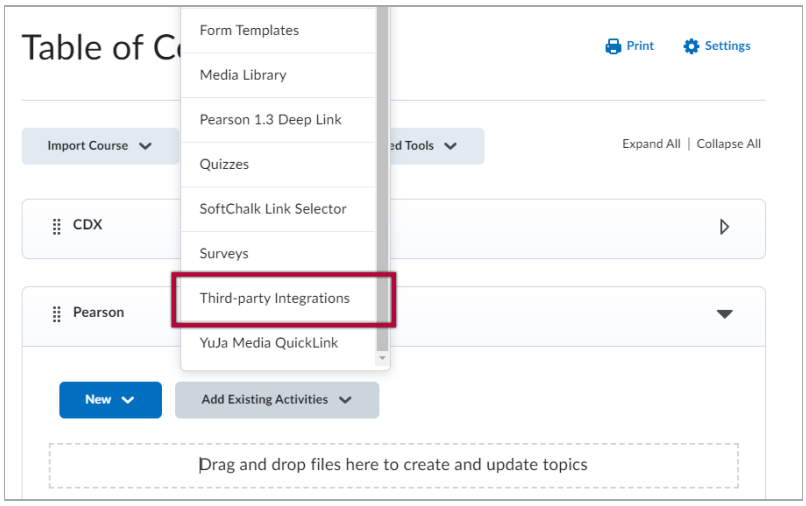

Adding the Pearson 1.3 Link to a D2L Course

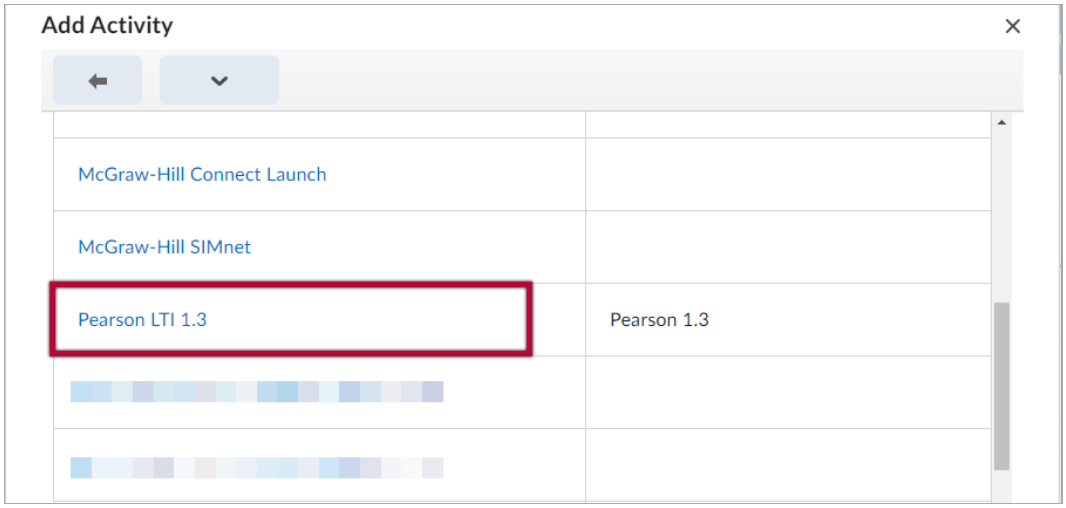

The following steps are **required** for all courses, as this link is required for students who **Opt Out** of the **STAR Bundle** to access Pearson.

1. Go to **Content** and select the module where you want to insert the Pearson integration.
   - For example, add a module and give it a name such as "Pearson Link for students opting out of Star Bundle".

2. In your new module, click **[Add Existing Activities]**, then select **[Third-party Integrations]**.

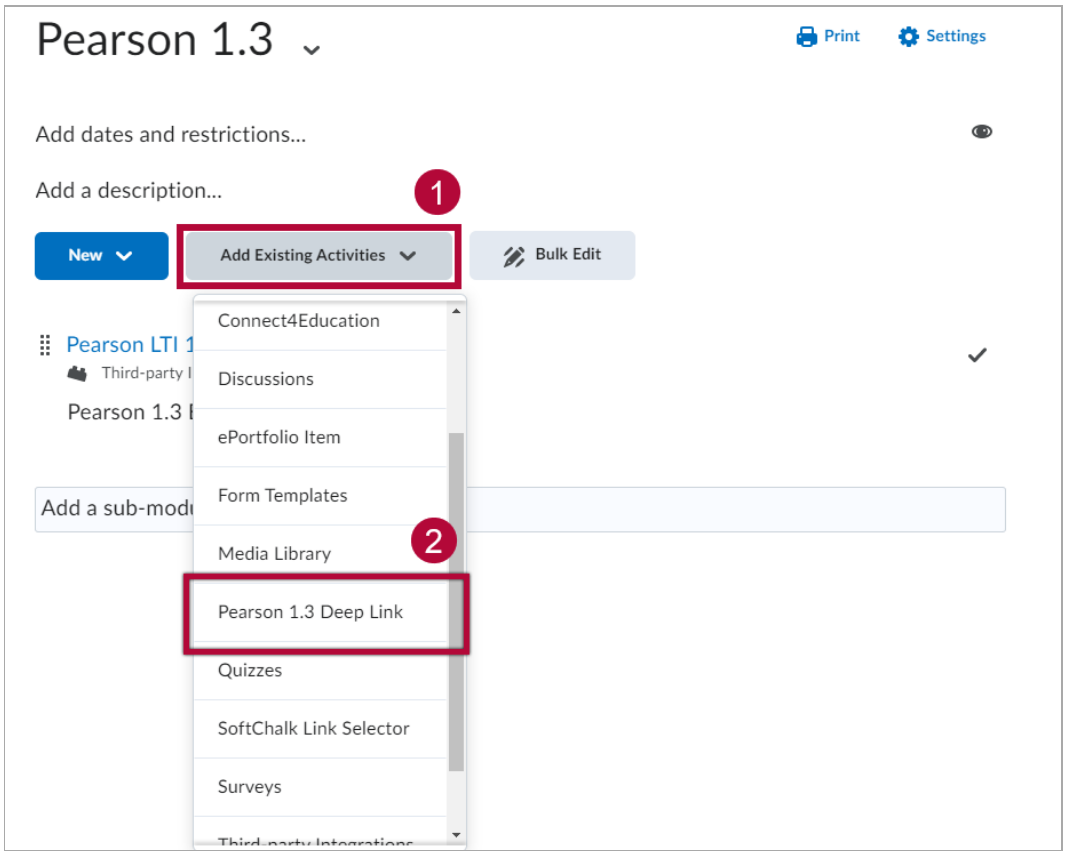

3. Click the **Pearson LTI 1.3** link.

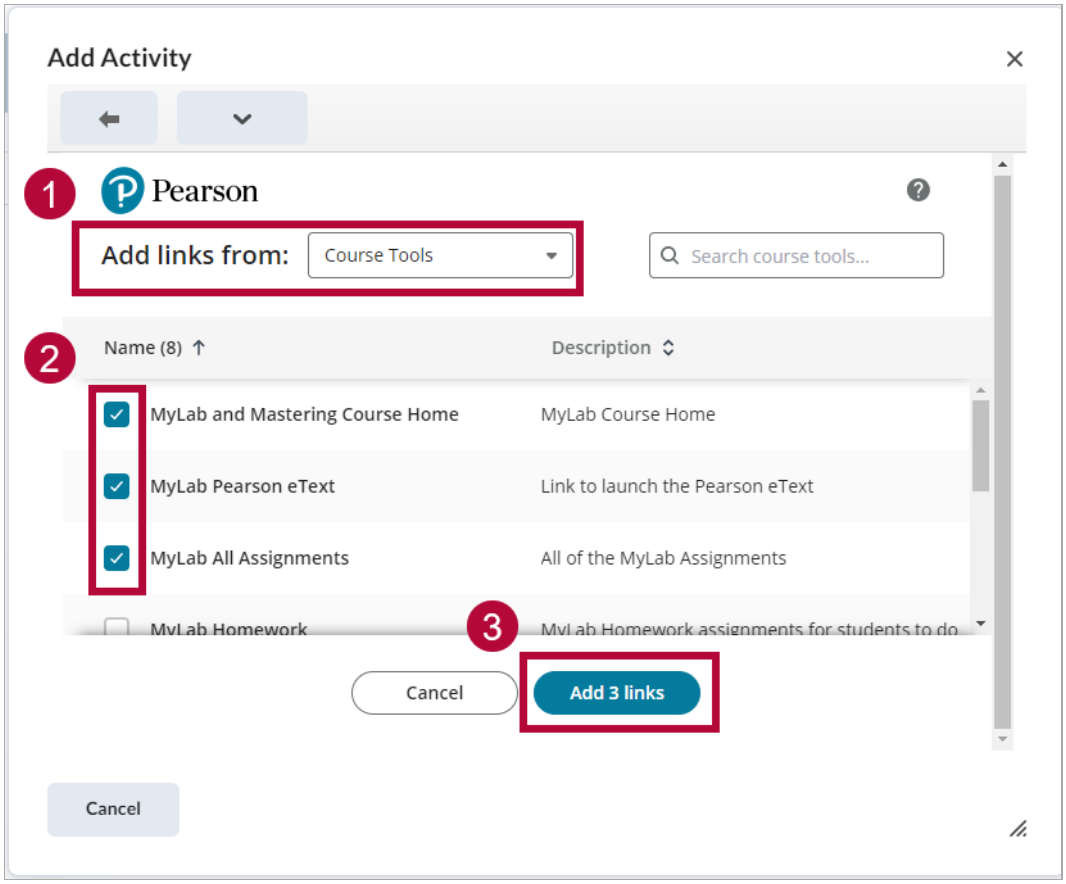

Adding Pearson 1.3 MyLab and Mastering Course Tools to Content

1. From within the D2L module, click on **[Add Existing Activities]** → **[Pearson 1.3 Deep Link]**.

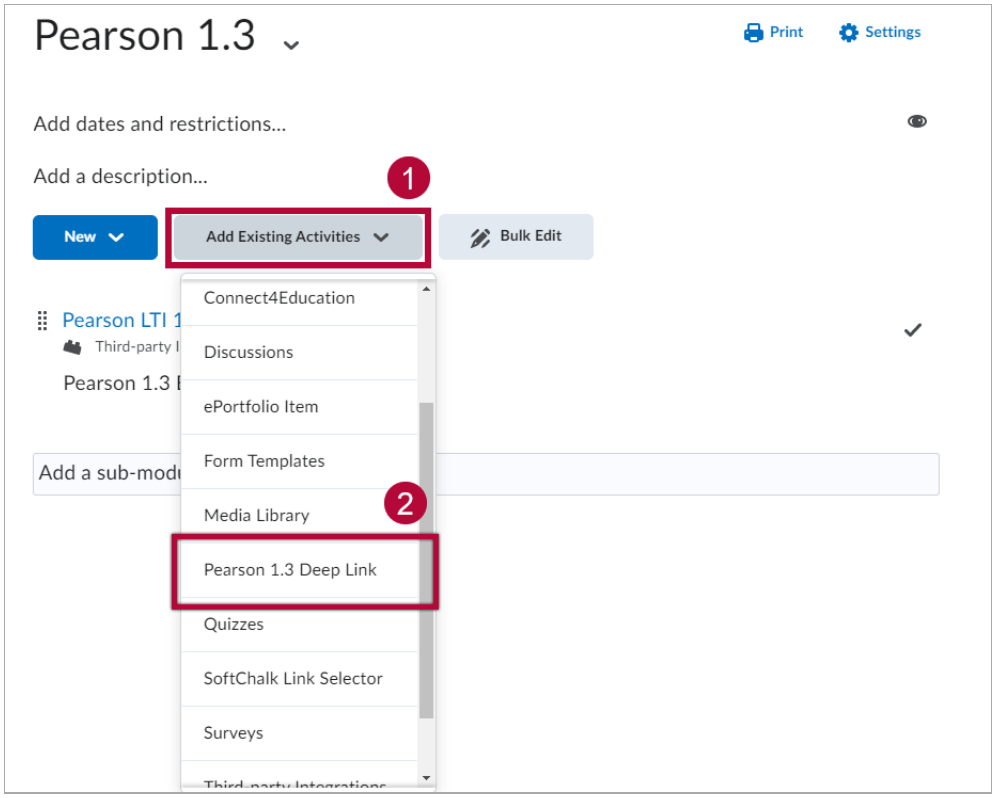

2. In the **Add links from** drop-down menu, select **[Course Tools]**. Check the boxes for the content you wish to add to your course, then click the **[Add links]** button at the bottom of the page.

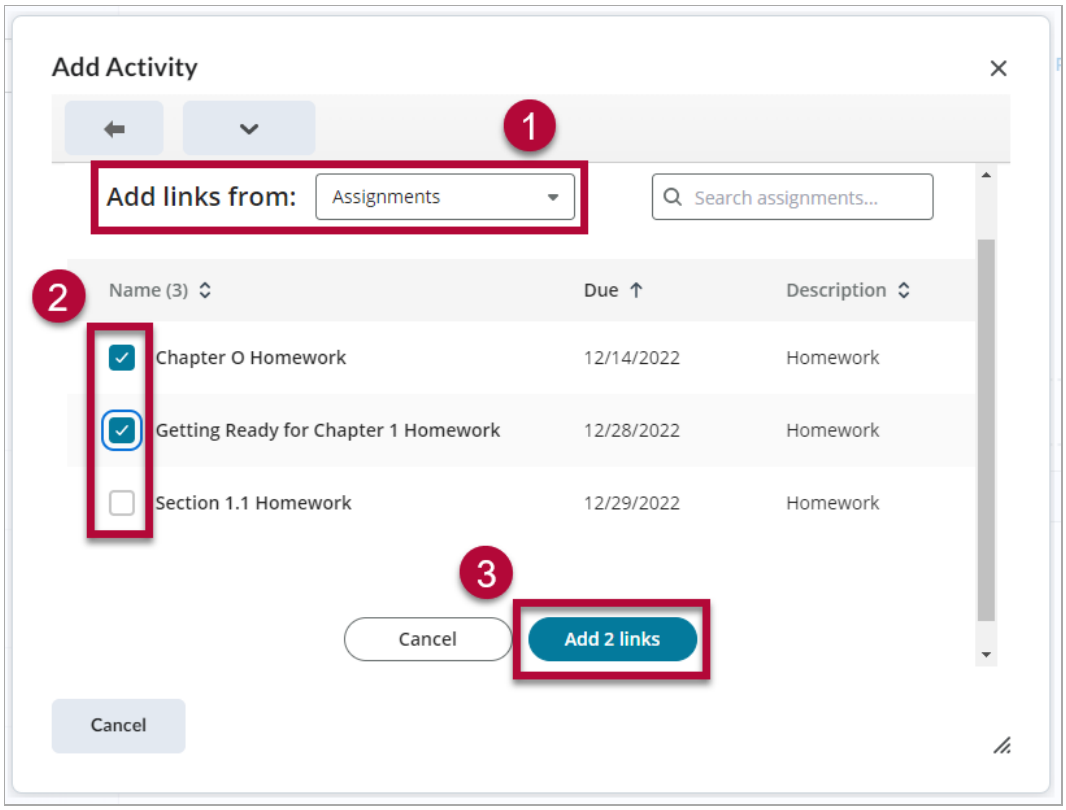

Adding Pearson 1.3 Assignments to Your Course Content

1. From within the D2L module, click on **[Add Existing Activities]** → **[Pearson 1.3 Deep Link]**.

2. In the **Add links from** drop-down menu, select **[Assignments]**.
   Check the boxes for the content you wish to add to your course, then click the **[Add links]** button at the bottom of the page.

NOTE:

- Grade items that are sent from Pearson to D2L are **NOT** put in categories, and will need to be manually moved to their proper category.
- When syncing grades, you will need to navigate to Pearson through **[Course Materials]**.
- Once you have accessed Pearson through **[Course Materials]**, the first step for a faculty to set up the gradebook is to click **[Sync Grades Now]**.
- The second step is to click **[Automatic Grade Sync]** to make sure it syncs student grades automatically.
- For additional questions, please contact your Pearson representative.
