

# Enroll Multiple Users in a Community Group

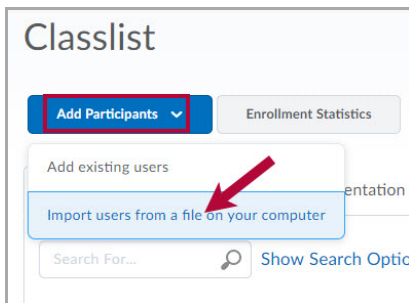

Last Modified on 10/16/2023 10:33 am CDT

## Enrolling Multiple Users in a Community Group Using a Text File

Group Managers have the ability to enroll multiple users into a Community Group by importing a text file (.txt or .csv) that includes the users' Org Defined IDs (LSCS ID) and assigned Roles (Group Manager, Faculty, or Student) in the community.

Show Video Walkthrough

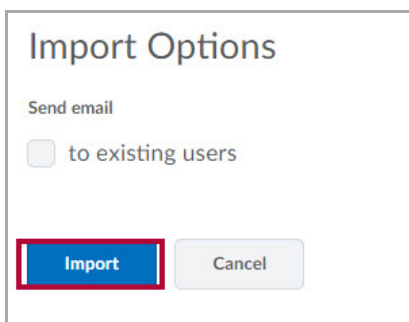

1. On the navbar, choose **Collaboration > Classlist**.
2. Click the **Add Participants** button, then choose **Import users from a file on your computer**.

- The format of the file you upload should be "Org Defined ID, Role."
  - Click the Sample Text File to download an example of the correct format for the Org Defined IDs and assigned Roles.
3. Click on **Choose File** and navigate to your text file (.txt or .csv).

4. Click **Import**.

**NOTE:** Only existing D2L users can be added using this process, and only Group Managers have these options.

## Adding Existing Users

Adding users that already exist in the D2L LMS is most easily accomplished by using the Org Defined ID number. Usernames or first and last names may be utilized as well in the search. If you do not locate a user from the Org Defined ID, that may need to have their D2L account created. If you are unable to locate a user via the ID number or username, please contact OTS.

1. Click **Add Existing Users** from the Add Participants menu.
2. Enter the Org Defined ID (student or employee ID number) and click the small magnifying glass symbol to start your search.

The screenshot shows the 'Add Existing Users' page. At the top, there are 'Enrollment Options' including a role selection dropdown and a 'Set all roles' button. Below that is a search section with a text input field containing '008' and a magnifying glass icon. A dropdown menu is open from the search icon, listing roles: 'Faculty', 'Copy Only', 'Group Manager', 'No Access', 'Observer', 'Scribe-Interpreter', 'Student', 'Teaching Assistant', and 'Learning Support Person'. The 'Copy Only' role is highlighted in red. Below the search results, there is a table with one entry: 'Alan' with Org Defined ID '008'. At the bottom, there are 'Enroll Selected Users' and 'Cancel' buttons. A red arrow points to the 'Enroll Selected Users' button.

3. In the list of search results, select the role for the user. You can assign any of the roles that are listed. The **Copy Only** role is most useful for individuals that need to have the ability to copy FROM your group into other courses or groups.
4. After selecting the user and role click **Enroll Selected Users**.  
View [D2L Roles Chart \(https://vtac.lonestar.edu/help/d2l-roles\)](https://vtac.lonestar.edu/help/d2l-roles) for details.

**NOTE:** If you see the "Already Enrolled" indicator on a Username, then that user is already enrolled in your group. Enrolling the user a second time may return an error. You may need to remove and re-enroll an already enrolled user to update their role.
