

# Record With YuJa Software Capture

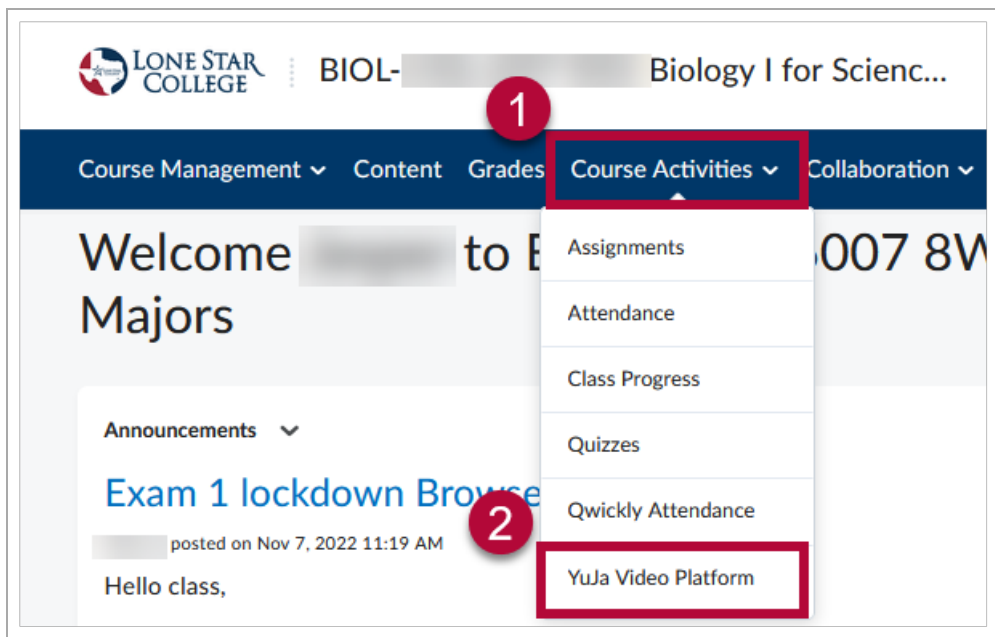

Last Modified on 02/07/2025 12:02 pm CST

**YuJa Software Capture** allows you to simultaneously record video from your webcam, capture your computer screen, and record audio. This all-in-one functionality makes it an ideal tool for creating instructional videos, presentations, and lecture recordings. Whether you need to demonstrate software, deliver a narrated slideshow, or record a live lecture, **YuJa Software Capture** provides a seamless way to integrate multiple media sources into a single recording.

[Windows Capture Overview Video](#)

[Apple Capture Overview Video](#)

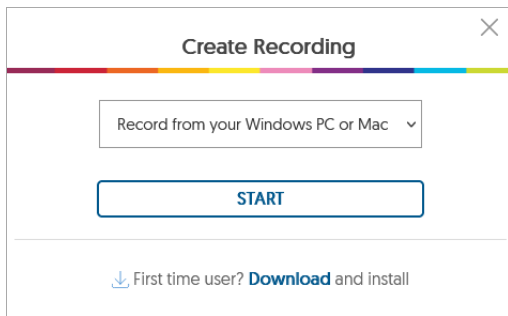

1. From your D2L Course, click [**Course Activities**] -> [**YuJa Video Platform**].

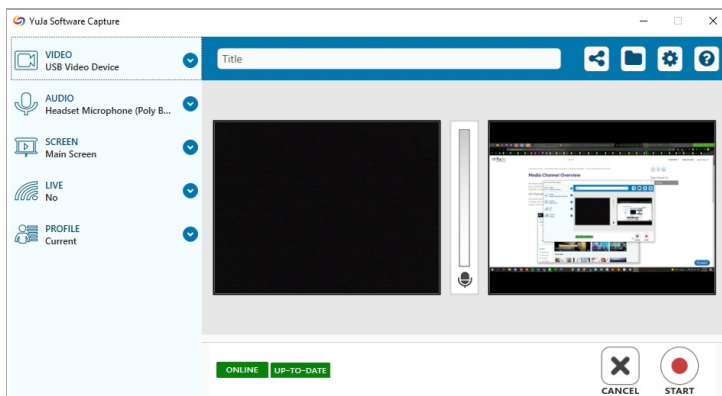

2. From the YuJa homepage, Click on **Create Recording**.

3. On the Create Recording window, use the drop-down menu to choose between **Record from your Windows PC or Mac**, or **Record with Browser Capture Studio**. Click [**Start**].

Select **Record from your Windows PC or Mac** to launch the **YuJa Software Capture** window.

4. Configure **Video, Audio, Screen** to preference from the left toolbar. By default, these settings will be set to **ON**.

- **Video**- Configure up to two video sources by clicking the drop-down menu.

Click on **Advance Settings** to adjust **capture resolution** and **frame rate**.

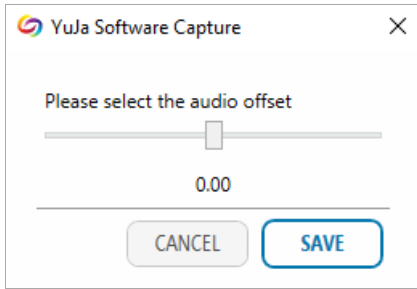

This determines video quality and file size. With great video quality comes great file size.

- **Audio**- Configure up to two microphone sources.

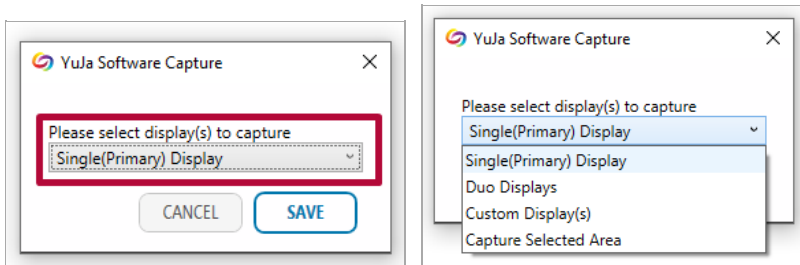

Click on **Advance Settings** to adjust audio offset if needed. Recommended to leave this at 0.00.

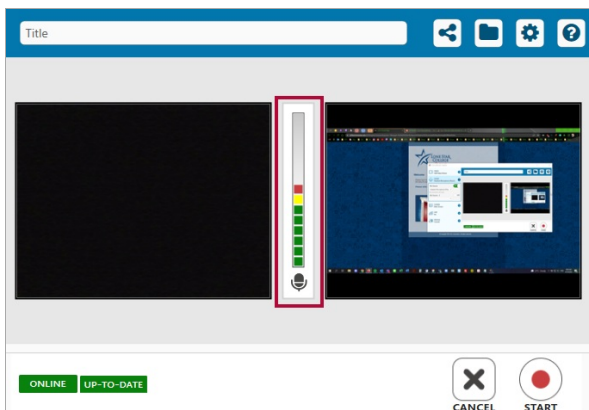

- **Screen-** Configure the source of where you want YuJa to record.

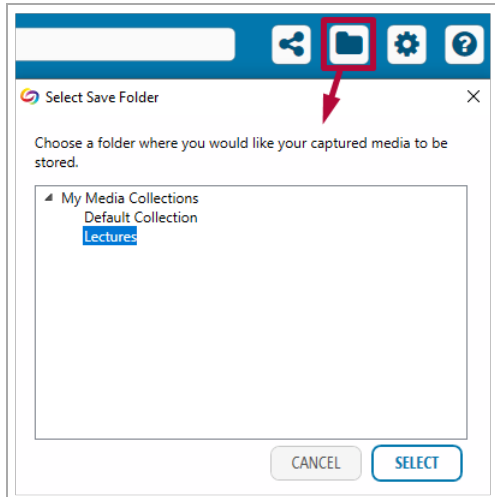

Click on **Advance Settings** to configure which display to capture, select **Capture Selected Area** to only capture a specific area of your screen.

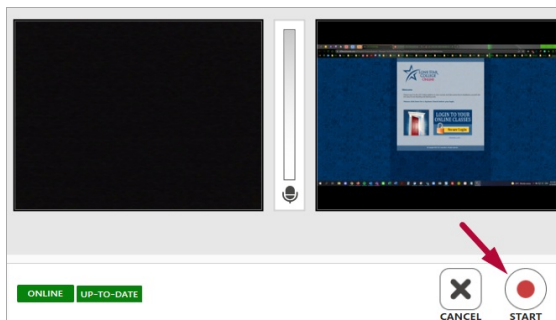

5. On the **YuJa Software Capture** window, verify that the microphone is recording your voice. Speak into your mic and see if colored blocks pop up in the center bar.

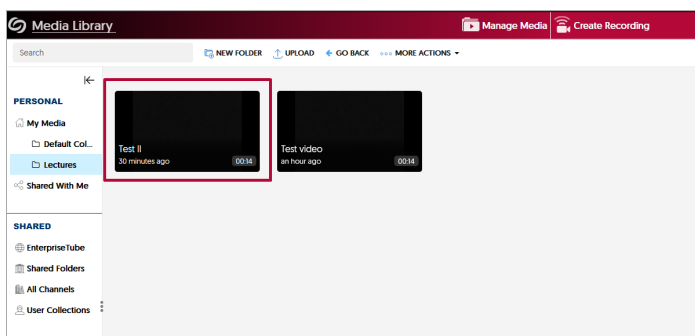

6. Select the **Folder** icon above to configure the location of your recordings within your **YuJa Media Library**. Please refer to [Manage Your YuJa Videos](https://vtac.lonestar.edu/help/manage-yuja-videos) (<https://vtac.lonestar.edu/help/manage-yuja-videos>) for tips on how to set up folders within your **YuJa Media Library**.

7. Hit **[Start]** to start recording.

8. When finished, your video will be saved within the specified folder at your **YuJa Media Library**.

**NOTE:** At any time, if your YuJa window is nowhere to be found, please check your task bar. You may need to click on **Show Hidden Icons** to reveal the YuJa icon. Double clicking the

YuJa icon will bring back the **YuJa Software Capture** window.
