

Create a YuJa Video Quiz

Last Modified on 09/30/2024 9:56 am CDT

You can add quizzes throughout your YuJa video to encourage student engagement and assess student understanding.

When properly importing a **YuJa Video Quiz** or **Playback Quiz** into your D2L course, it will automatically generate a grade item in your D2L gradebook. The default point value for YuJa grade items is **100 points**.

If you prefer to change this, please remember to do so **before** your students begin taking the Video Quiz or Playback Quiz. Changing the point value for the grade item **AFTER** grades have already appeared for it in the D2L gradebook will alter the grades already received. However, there is a way to correct this if you **manually** re-sync the grades from the YuJa gradebook to D2L by following the steps [in this article \(https://support.yuja.com/hc/en-us/articles/1500007406362-On-Demand-LMS-Gradebook-Sync\)](https://support.yuja.com/hc/en-us/articles/1500007406362-On-Demand-LMS-Gradebook-Sync).

NOTE: As of September 20, 2024, a recent update to **YuJa Playback Quizzes** now allows users to add quiz questions, similar to a Video Quiz, when editing. Currently, **we advise faculty not to use this feature**, as the results are inconsistent and can be confusing. Adding questions appears to transform the Playback Quiz into a Video Quiz, with playback tracking treated as a single bonus question. However, the functionality and outcomes remain unreliable.
