

Remove Third-Party Integration Content and the Associated Grade Items

Last Modified on 02/06/2026 12:09 pm CST

Third-party Integration Content refers to certain publisher content, McGraw Hill videos, Cengage integrations, and other vendor content.

ALERT: If you remove a Third-party Integration item from a course without disassociating it from its Grade Item, you may be unable to delete its grade item. This can require Admin intervention to remove the grade item. Before deleting any content items associated with a grade, check for "**Third-party Integration**" below the content item.

The screenshot shows a course titled "Understanding Childhood Development". At the top, there are buttons for "New", "Add Existing Activities", and "Bulk Edit". Below the title, a list of activities includes "Video: Man on the Street" and "Third-party Integration", with the latter being highlighted by a red box.

Disassociate Third-party Integration items

1. Click on the title of the Third-party content topic.
2. Scroll down below the content to the **Activity Details** area.

The screenshot shows the "Activity Details" section for a topic. It includes a "Reflect in ePortfolio" button, a "Required: Automatic" setting with a checkmark, a note "View this topic to complete the activity", and a "Add dates and restrictions..." link.

3. Click on the **[Grade Item name]** below **Assessment**.

4. Select **[No Grade]** from the drop-down menu.

5. Click **[Save]**.

6. Now the Third-party Integration Content and the Grade Item can be deleted.
