

Remove Third-Party Integration Content and the Associated Grade Items

Last Modified on 08/16/2023 7:53 am CDT

Third-party Integration Content refers to certain publisher content, McGraw Hill videos, Cengage integrations, and other vendor content.

ALERT: If you remove a Third-party Integration item from a course without disassociating it from its Grade Item, you may be unable to delete its grade item. This can require high-level intervention to remove the grade item. Before deleting any content items associated with a grade, check for "**Third-party Integration**" below the content item.
