

Set Release Conditions for a Quiz

Last Modified on 08/03/2023 8:22 am CDT

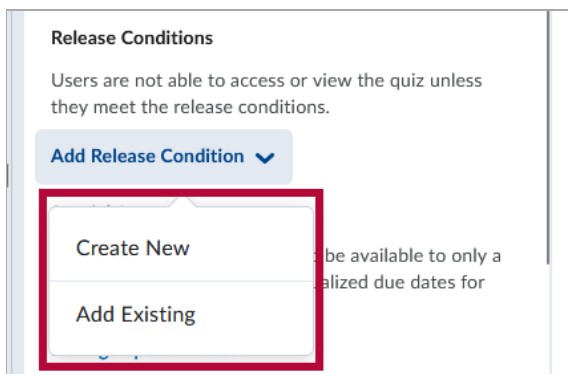

Release conditions allow you to create a custom learning path through the materials in your course. These conditions allow you to associate the ability to see a quiz with other actions in D2L. For example, you can require that students visit a set of lecture notes in the Content tool or submit to an assignment before they can access a quiz.

Set Release Conditions for a Quiz

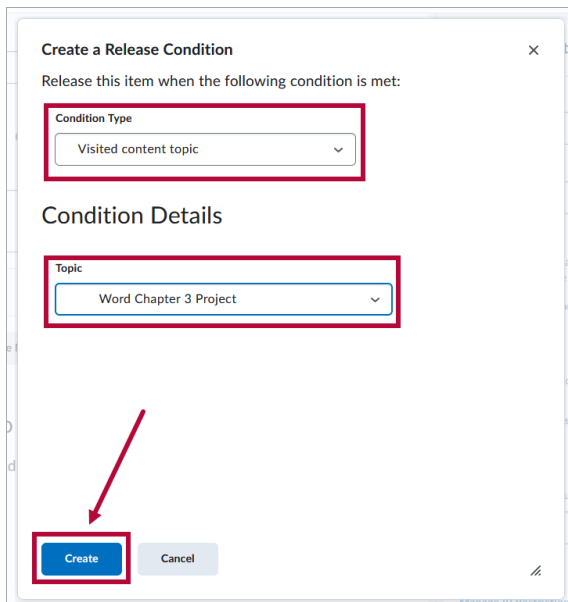

1. On the **New Quiz** or **Edit Quiz** page, click on the **[Availability Dates & Conditions]** section to expand it.

2. In the **Release Conditions** section, click **[Add Release Condition]** to bring up your options. Select **[Create New]** to create a new release condition. If you have already created the condition you want to apply, select **[Add Existing]**.

3. If creating a new condition, select a **Condition Type** and specify the **Condition Details**, then click **[Create]**.

4. If you are attaching an existing condition, choose the condition that you want to apply.
5. After attaching multiple release conditions, the option to choose either **[All conditions must be met]** or **[Any condition must be met]** will appear. If you choose **[All conditions must be met]**, students will need to meet all release conditions to access the assignment folder. Choosing **[Any condition must be met]** means that as long as students meet any one condition, they will be able to access the conditionally released material.
