

Create a Question Pool

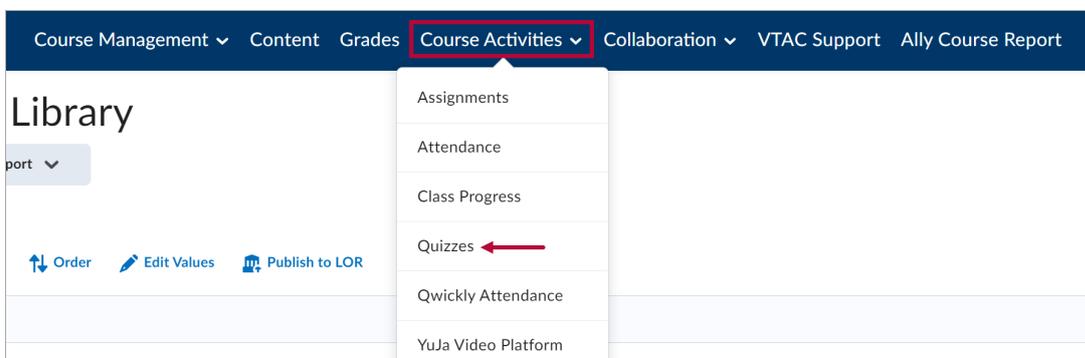

Last Modified on 03/31/2026 3:15 pm CDT

Question Pools allow instructors to give students a set number of randomly selected questions from a larger pool of questions. For instance, the questions for a 25-question quiz can be arranged to be randomly selected from a pool of 50 questions. To do this, you must have questions saved in your question library or previously created quizzes with questions in your course.

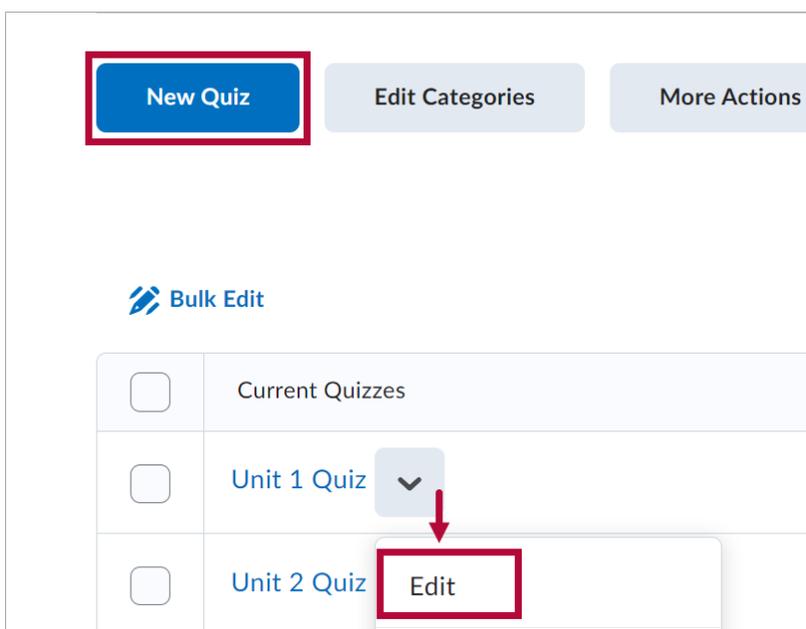

NOTE: Question pools are created at the quiz level.

Create a Question Pool

1. From the **Navbar**, click **[Course Activities]** and select **[Quizzes]**.

2. From the **Manage Quizzes** page, click the dropdown arrow next to the quiz you'd like to edit and select **[Edit]**, or create a new quiz by selecting **[New Quiz]**.

3. Click **[Create New]** under the questions area.

Question Pool

5. Enter a **Question Pool Title**, the **Number of Questions to Select** for each quiz attempt, and how many points you want each question to be worth in the **Points per Question** field.

NOTE: To ensure fairness, all questions randomly selected from the question pool are assigned the same number of points.
