

Gradebook Options for Student and Instructor Views

Last Modified on 03/03/2023 10:57 am CST

On the gradebook settings, you can control the following display options to offer different views for instructors and students. These will determine how grade information is displayed. You have the ability to display or not, the points grade, the grade scheme symbol, the grade scheme color, and, in a weighted gradebook, the weighted grade.

Display options

Points grade

Displays the points scored out of the max points - e.g., 80/100.

Weighted grade

Displays how much the grade item is worth in relation to its category or the final grade - e.g., 4/5 (for a student who scored 80/100 points on a grade item worth 5% of the final grade).

NOTE: This option is only available if you chose the weighted grading system. This value can be confusing to students.

Grade scheme symbol

Displays the grade scheme symbol for the score they received on a grade item - e.g., "80%" or "B."

NOTE: The default grade scheme will display the percentage grade as the grade scheme symbol. See [Gradebook Schemes \(https://vtac.lonestar.edu/help/a191\)](https://vtac.lonestar.edu/help/a191) for more information.

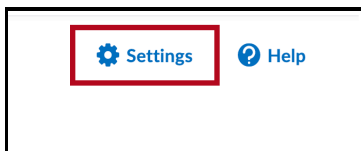

Grade scheme color

Displays the grade scheme color associated with the scheme level.

NOTE: If you select colors for your grade scheme color, they will be turned on by default for the instructor view.

To Set the Student View

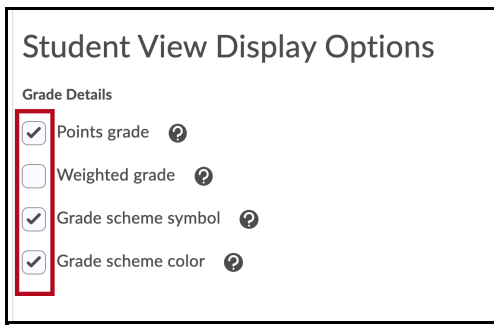

1. Click **Grades** on the navbar.
2. Click the **Settings** icon in the top right corner.

3. Click on the **Org Unit Display Options** tab.

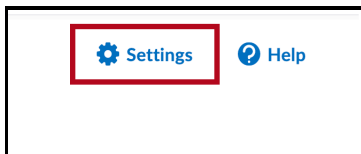

4. Under "Student Display Options," select the options you would like displayed to students.

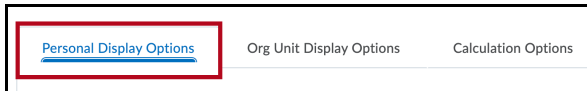

To Set the Instructor View

1. Click **Grades** on the navbar.
2. Click the **Settings** icon in the top right corner.

3. Click on the **Personal Display Options** tab.

4. In the "Grade Details" section, select the options you would like to see.
