The Insights Portal allows you to measure the quality of your assessments based on several metrics ([https://documentation.brightspace.com/EN/insights/-/admin/d2l\\_insights\\_using\\_assessment\\_dashboard.htm?topath=Administrators%7CBrightspace%20Performance%20Plus%20Analytics%7CBrightspace%20Insights%7CUsing%20Brightspace%20Insights%20Dashboards%7CUsing%20the%20Assess](https://documentation.brightspace.com/EN/insights/-/admin/d2l_insights_using_assessment_dashboard.htm?topath=Administrators%7CBrightspace%20Performance%20Plus%20Analytics%7CBrightspace%20Insights%7CUsing%20Brightspace%20Insights%20Dashboards%7CUsing%20the%20Assess))

including the reliability coefficient. To view those metrics:

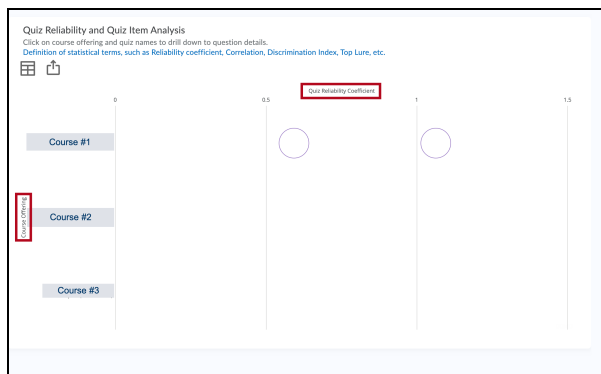

1. On your D2L homepage, click on **Faculty Tools** in the navbar and choose **Insights Portal**.

2. Click on the **Assessment Quality for Faculty** tile.

3. In the graph that appears, your courses are listed along the y-axis. The x-axis represents the quiz reliability coefficient. Each quiz will be plotted based on what course it is in and what its reliability coefficient is.

4. Click on the circle for one of the quizzes to see more detail about that quiz, such as average score and number of learners.

Quiz	Average Score	No. of Learners	No. of Questions	Reliability Coefficient
Syllabus Quiz (id: 25580)	9.0%	3	8	0.59

5. Click on the name of the quiz to drill down to information about the quiz questions.
