

Add CHEM101 to Your D2L Course

Last Modified on 02/06/2025 1:31 pm CST

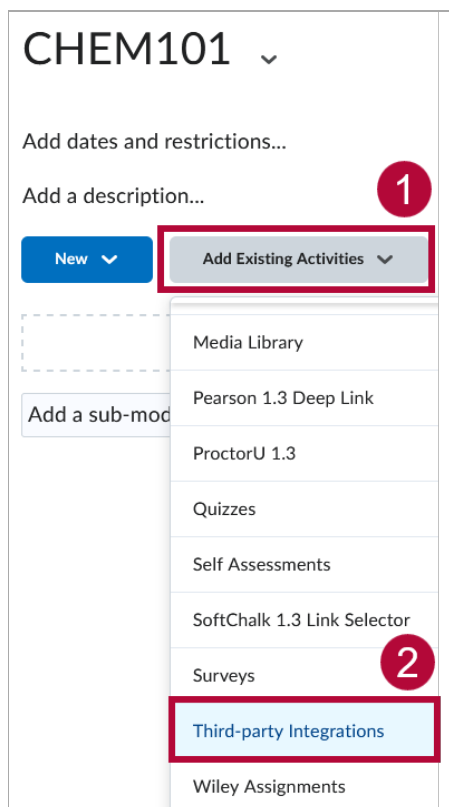

LSC-Online does not have access to your **CHEM101 (Aktiv)** account. For integration issues, or if you have any questions, please contact your Aktiv Learning representative **Gabrielle Povoia Foy** at gabrielle@aktiv.com ().

Add CHEM101 to Your Content Module

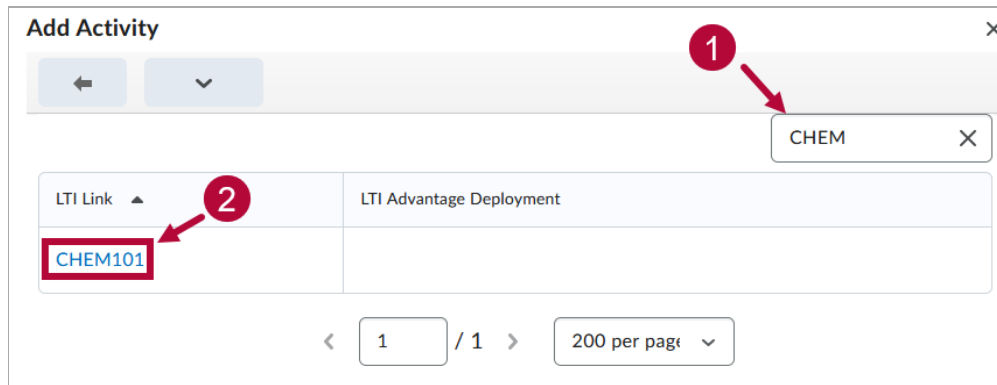

1. Create a new module and name it **CHEM101**.

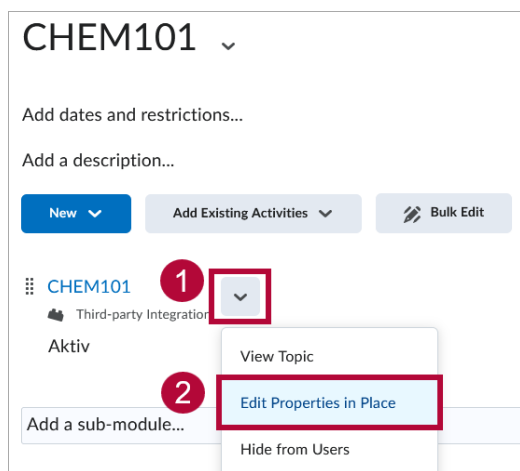

2. Within the newly created module, select **[Add Existing Activities]** → **[Third-party Integrations]**.

3. Type in *CHEM* in the **[Search Box]**, hit **[Enter]**, then click on the **[CHEM101]** LTI link below.

4. Once the link has been created in the **Content Module**, select **[Edit Properties in Place]**.

5. Enable the checkbox **[Open as an External Resource]**. The tool is now available for you to use to link to CHEM101.
