Record with YuJa Browser Capture Studio

Show Video Walkthrough

1. From your D2L Course, click **[Course Activities]** → **[YuJa Video Platform]**.

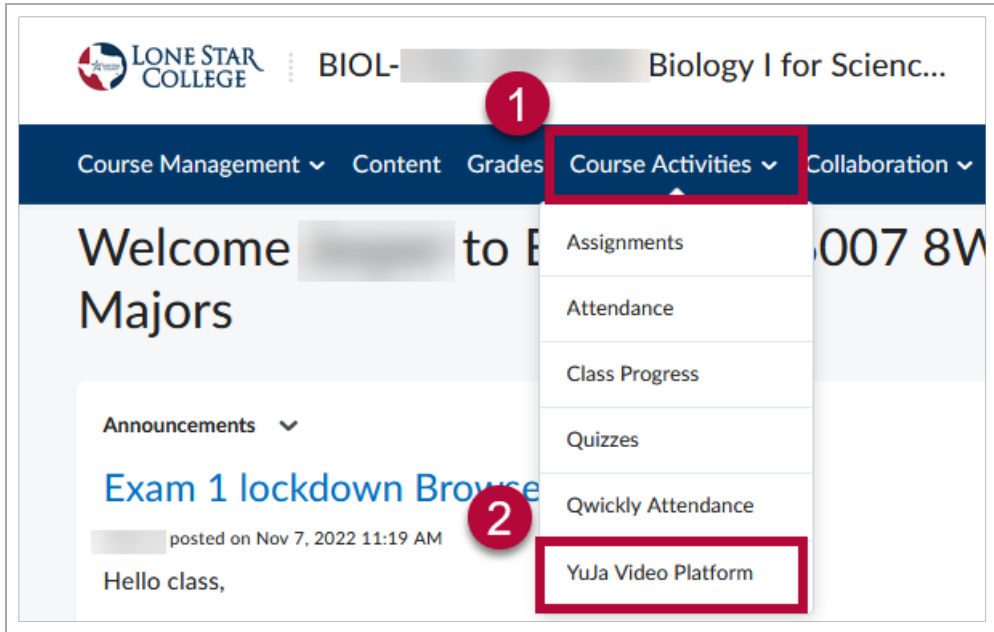

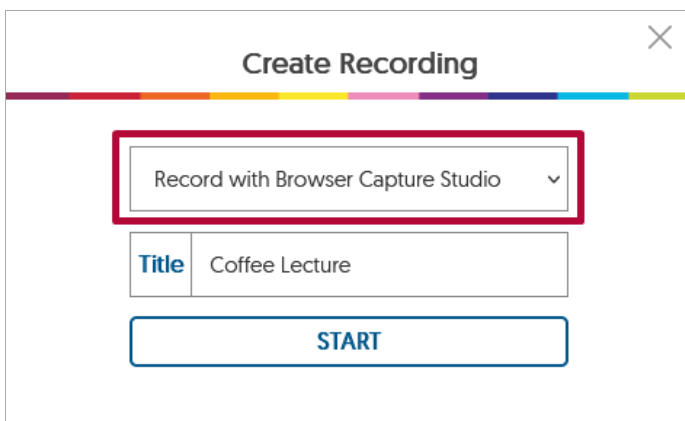

2. From the YuJa homepage, Click on **[Create Recording]** at the top of the page.

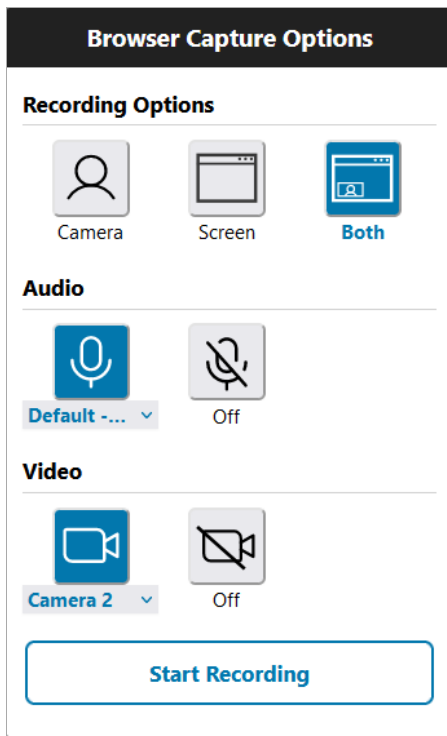

3. On the Create Recording window, use the drop-down menu to select **Record with Browser Capture Studio**.
   Title your video, then click **[Start]**.

4. You will see **Browser Capture Options** on the left side.

5. **Recording Options**: You can configure your recording options between **Camera**, **Screen**, or **Both**.
   This is the video layout of what your students will see.

   Make sure you choose the correct screen, window, or application for where you want to record from. Click on **[Allow]**.
   > **NOTE:** Minimized windows will not appear as a selection here, the window must be restored to a normal size first.
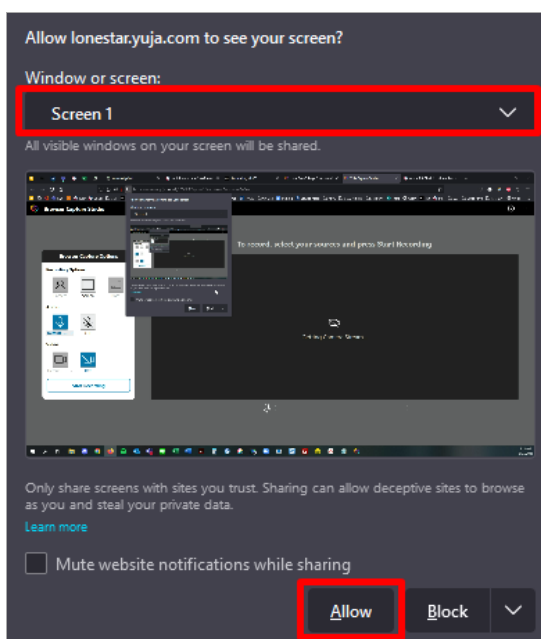

6.

7. **Audio**: Configure your **Microphone** here through the drop-down menu.
   Be sure to choose the correct audio input device for your device.

8. Click on **Allow** on the prompt below.

9. Verify that the audio bar below the video panel is detecting sound, you should see a fluctuating blue meter reacting to your voice.

10. **Video**: Configure your **Face Camera** here through the drop-down menu.
   Be sure to choose the correct **Webcam** for your device.

11. Click on **Allow** on the prompt below.

Allow lonestar.yuja.com to use your camera?
