## Disable Fast Forwarding on a YuJa Video/Playback Quiz

Last Modified on 03/17/2025 1:36 pm CDT

Playback Quizzes allow instructors to give students credit for watching a video.

1. From your **YuJa Media Library**, locate the video for which you want to create a **Video Playback Quiz**. Then, hover the mouse over the video and select [More].

2. Select [Quizzes] on the left navigation pane, followed by [Create Playback Quiz].

- 3. Give the quiz a **Title**, then choose between:
  - A. **Give full credit based on threshold**: This option allows instructors to specify a percentage amount of the video for students to watch. Students who watch less than the specified percentage will earn a grade of 0. Students who meet or watch more than the

specified percentage will earn a 100.

B. **Give credit based on percentage watched**: This option allows instructors to award students credit based on the percentage amount their students watched. For example, a student who watches 75% of a video will earn a 75 for a grade.

When finished, select [Create].
