# Add a YuJa Video as a Direct Link into D2L
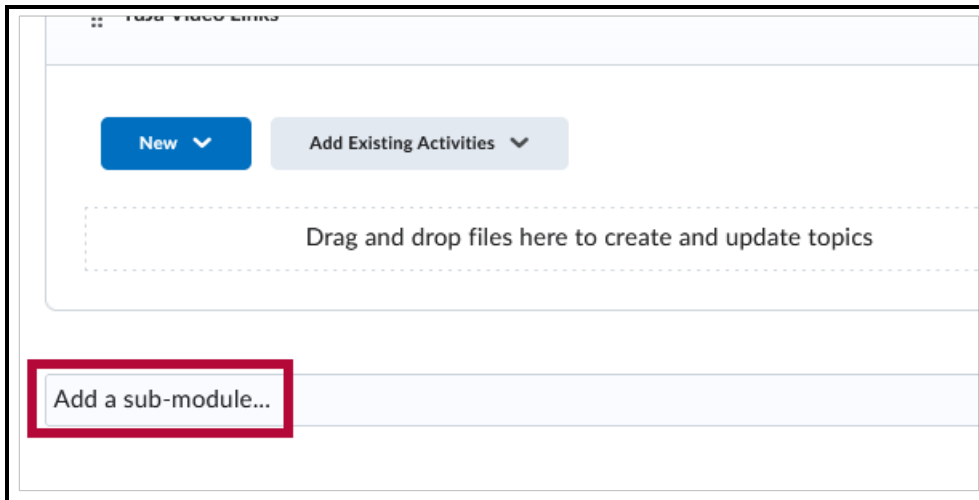

Last Modified on 10/05/2022 3:30 pm CDT

1. Mouse over your video and click **[More]**.

2. Within the Media Details window, click on **[Links]** tab on the left, then click on the **[Copy Direct Link]** icon at the end of your video's Direct Link as shown. This will copy your video's direct link onto your clipboard.

3. **Paste [Ctrl+V]** the link within a sub-module within your course, this is where you want students to access your video. You can create a sub-module through the **[Add a sub-module]** button in any Content module.

4. Within a sub-module -> **[New]** -> **[Create a Link]**.

5. Name your video in the **Title** field.
   Paste the link from step (2) within the URL field, then click on **[Create]**.

6. Voila! Your YuJa video will now show up in your module as a functioning link.
