

Add F.A.Davis to Your D2L Course

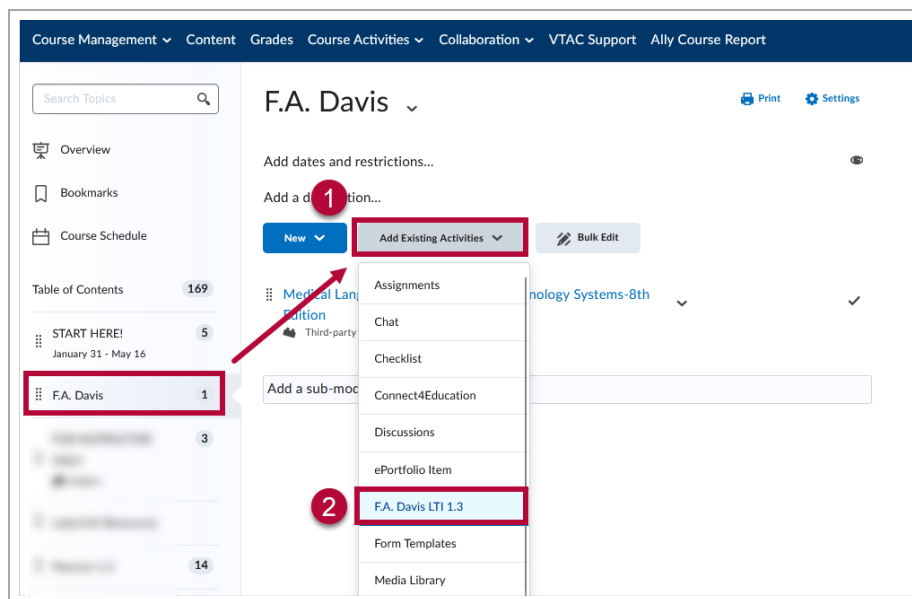

Last Modified on 12/11/2025 11:14 am CST

Currently, this integration is for **LSC-Tomball** only.

Online Services does not have access to your **F.A.Davis** account. For integration issues or questions, please contact [F.A. Davis Support \(https://customersupport.fadavis.com/home/\)](https://customersupport.fadavis.com/home/).

Inserting Content Into Your Course

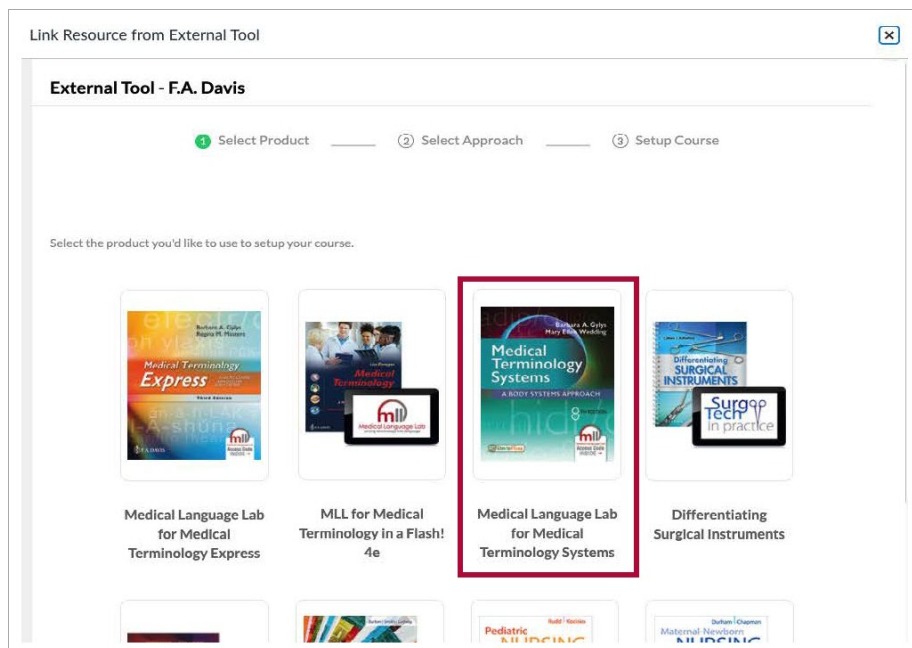

1. From the content module, click **[Add Existing Activities]** → **[F.A. Davis LTI 1.3]**.

2. From the pop-up, select the desired product. After selecting the product, click **[Add Content]**.

In this example, we will use *Medical Language Lab for Medical Technology Express*.

NOTE: You will only see the products listed that you have been given access to by F.A. Davis.

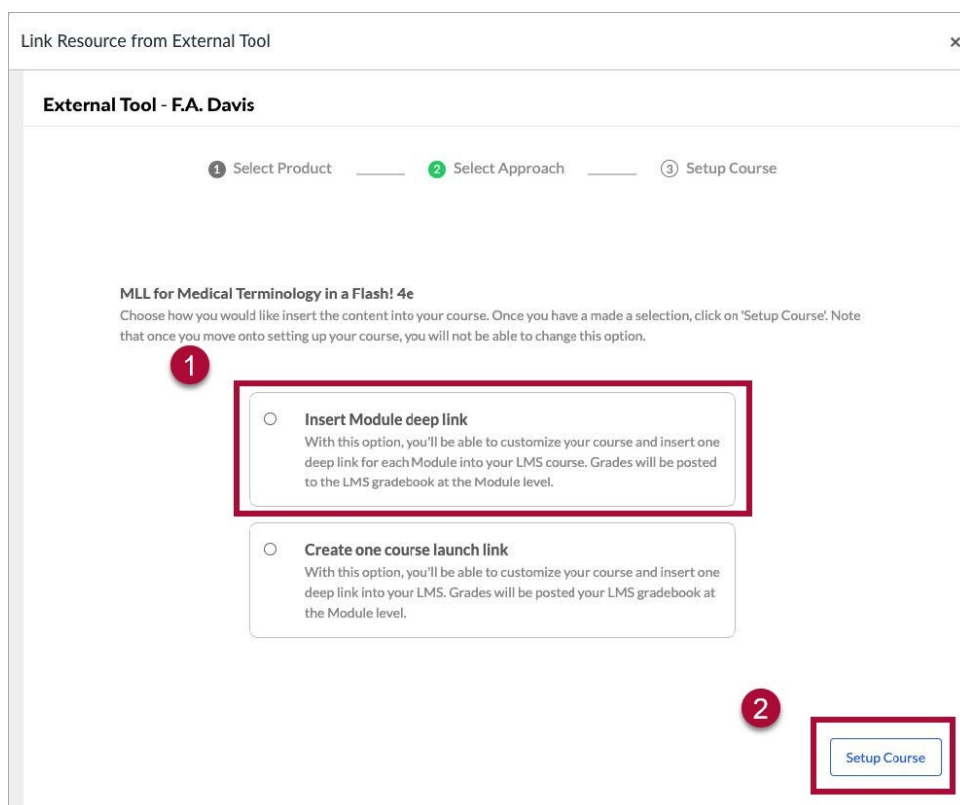

3. On the following page, you have two options for how you'd like to insert your content: **Module level**, and **Course level**.

Insert Module Deep Link

1. After selecting the **[Insert Module deep link]** approach, click on **[Setup Course]**.

NOTE: Once you make a selection on this step, you will **NOT** be able to edit it. If a change is required, you will need to create a new course and start over.

2. Select the Modules you'd like to include in the course. You can customize the exercises that

are included in each Module by clicking on the details arrow icon and deselecting them. Once you are finished, click **[Insert Course]**.

NOTE: You will need to launch any of the deep links inserted at least once before students will be able to successfully launch the modules.

1 Select Product — 2 Select Approach — 3 Setup Course

MLL for Medical Terminology in a Flash! 4e
Choose how you would like insert the content into your course. Once you have made a selection, click on 'Setup Course'. Note that once you move onto setting up your course, you will not be able to change this option.

1

☐ **Insert Module deep link**
With this option, you'll be able to customize your course and insert one deep link for each Module into your LMS course. Grades will be posted to the LMS gradebook at the Module level.

☐ **Create one course launch link**
With this option, you'll be able to customize your course and insert one deep link into your LMS. Grades will be posted your LMS gradebook at the Module level.

2

Setup Course

2. You will have the option to either **[Customize Course]** or **[Use Default Setting]** to create your course. Choosing to customize your course will launch the application in a new browser tab. Navigate to the new tab and go through the steps to create your course. Once you have completed setting up your course on the application and you are on the **Summary** screen, return to the D2L tab. Your course has been created and can be inserted as one deep link by clicking on **[OK]** from the pop-up in D2L.

NOTE: You will need to launch any of the deep links inserted at least once before students will be able to successfully launch the modules.
