Add Electude to Your D2L Course

Last Modified on 05/13/2025 2:59 pm CDT

LSC-Online does not have access to your **Electude** account. For integration issues, please contact your Electude representative

Darcy Wedel at <u>darcy.wedel@electude.com ()</u>

Electude is an automotive e-learning platform offering programs in light vehicles, heavy vehicles, and systems technologies. Its learning modules use gamification and interactive content such as animations and simulations. At Lone Star College, this integration is used by the Automotive Program.

Enabling Electude in your D2L Course

- 1. Email <u>VTAC@lonestar.edu ()</u> requesting Electude be enabled in your D2L course.
- 2. Include a list of the courses, complete with **Subject Area**, **Catalog Number**, and **Section Numbers**. Please include the term in which you would like to use Electude.

Adding Electude 1.3 to Your D2L Course

- 1. Open your course in D2L.
- 2. Go to **Content** and select or create the module where you want to add Electude. For example, create a module and name it *Electude*.

NOTE: The **Electude Course Designer** tool gives faculty access to the full range of Electude content adopted by the college. It is ideal for instructors who wish to:

A. Build a custom course by modifying an existing course or starting from scratch.

- B. Remove students who have dropped but were added to Electude via LTI.
- C. Reset activity attempts for returning students.
- Once added, Electude Course Designer will appear in your module. Be sure to hide this link from students by adjusting the Visibility and Completion settings. For assistance with the tool, contact Darcy Wedel at <u>darcy.wedel@electude.com ()</u>.

ALERT: The **Electude Course Designer** content link is for Faculty use only and must be **hidden from students**. Please see <u>Visibility and Completion Options in Content Modules</u> (https://vtac.lonestar.edu/help/visibility-and-completion-options-in-content-modules) for guidance on hiding content links.

Adding Electude 1.3 Deeplinks

Faculty have two options for adding Electude content to their D2L course:

- I. Insert a single link that grants access to the full Electude course.
- II. Choose to add individual modules or activities using deep links.

This flexibility allows instructors to tailor how Electude content is presented within their course structure.

NOTE: Work with your **Electude representative** to determine the best option for your course before adding content.

1. From within the D2L module, click [Add Existing Activities] → [Electude 1.3 Deeplink].

Option 1: Add Full Electude Course via Single Link

For example, if an instructor wants students to access the full *Classroom: A1 Engine Repair* course in Electude with one click, they would use **Option 1**. This approach is helpful for instructors who prefer to manage the entire Electude course from within a single content link in D2L.

1. Click the **[Courses]** tab to see available courses.

Option 2: Add Links to Individual Content or Modules

Alternatively, if the instructor only wants to provide access to specific components—such as individual quizzes, chapters, or simulations—they would use **Option 2** by adding direct links.

1. Follow the steps above until you reach **Classroom: A1 Engine Repair**, but *do not select it as an LTI tool*. Instead, click **Chapter 1: Engine Repair Introduction**.

NOTE: In this example, *Chapter 1: Engine Repair Introduction* contains 38 individual modules. You will need to browse through the list and locate the specific activity you want to add as a deep link.
