This article covers the **Timing & Display** section of the quiz editor, including how to configure time limits, paging, question shuffling, display options, and header and footer settings.

▶ Show Video Walkthrough

The second panel on the right side of the **Edit Quiz** page is the **Timing & Display** section. Expand it by clicking on **[Timing & Display]**.

The screenshot displays the 'Coffee Quiz' editor interface. On the right-hand side, a vertical sidebar contains several configuration panels. The 'Timing & Display' panel is highlighted with a red border. A red arrow points from the top of this panel to the 'Due Date' field in the main editor area. The 'Timing & Display' panel shows settings for 'No time limit' and 'Header and footer added'. Other panels visible include 'Availability Dates & Conditions' (Always available), 'Attempts & Completion' (1 attempt allowed), and 'Evaluation & Feedback' (Auto-publish results, Sync to grade book, 1 result display). The main editor area shows a question: 'brewing method involves a semi hour-shaped glass?' worth 1 point, with a total of 5 points for the quiz.

The **Timing & Display** section of the right panel consists of five subsections.
