

Add Lumen One to Your Course

Last Modified on 02/03/2026 11:19 am CST

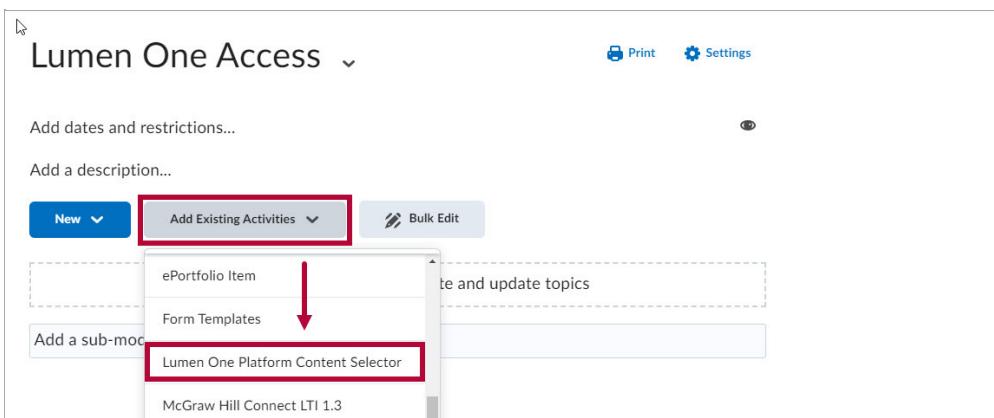

Online Services does not have access to your **Lumen One** account. For integrations issues or questions, please contact [Lumen One Support \(https://support.lumenlearning.com/lumen-one-support-request\)](https://support.lumenlearning.com/lumen-one-support-request).

Getting Your Course Set Up

1. Send an email to [VTAC@lonestar.edu \(\)](mailto:VTAC@lonestar.edu).
2. Include a list of the courses, complete with section numbers and terms, in which you want to use Lumen One.

Adding Lumen One to your Course Content Module

1. Go to **[Content]** and select the module where you want to insert the Lumen One integration. For example, add a module and give it a name such as "*Lumen One Access*".
2. In your new module, click on **[Add Existing Activities]**, then select **[Lumen One Platform Content Selector]**.

3. In the search box enter the title for the course or scroll down on the list of courses to select the desired course. For this example, select *Introductory Psychology*.

A high-level review of course concepts and structure.

Introductory Psychology

Lumen's Introductory Psychology course is a comprehensive introduction to psychology. It covers the main psychological domains as recommended by the American Psychological Association (APA) and includes specific applications of the APA's Introductory Psychology Initiative's student learning outcomes and integrative themes. With a focus on active learning, Introductory Psychology utilizes interactive content and practice with immediate feedback to maximize student understanding and retention. In addition to learning the material, students will also gain valuable study skills and see the practical applications of psychology to real life. In addition to learning the content, students have the opportunity to pause and apply their knowledge before participating in dynamic activities and discussions with their peers. The first time you add this course, faculty and student resources will be included in addition to your selected modules.

1 Select All

→ Module 1: Psychological Foundations

- Study Plan: Psychological Foundations
- Quiz: Psychological Foundations

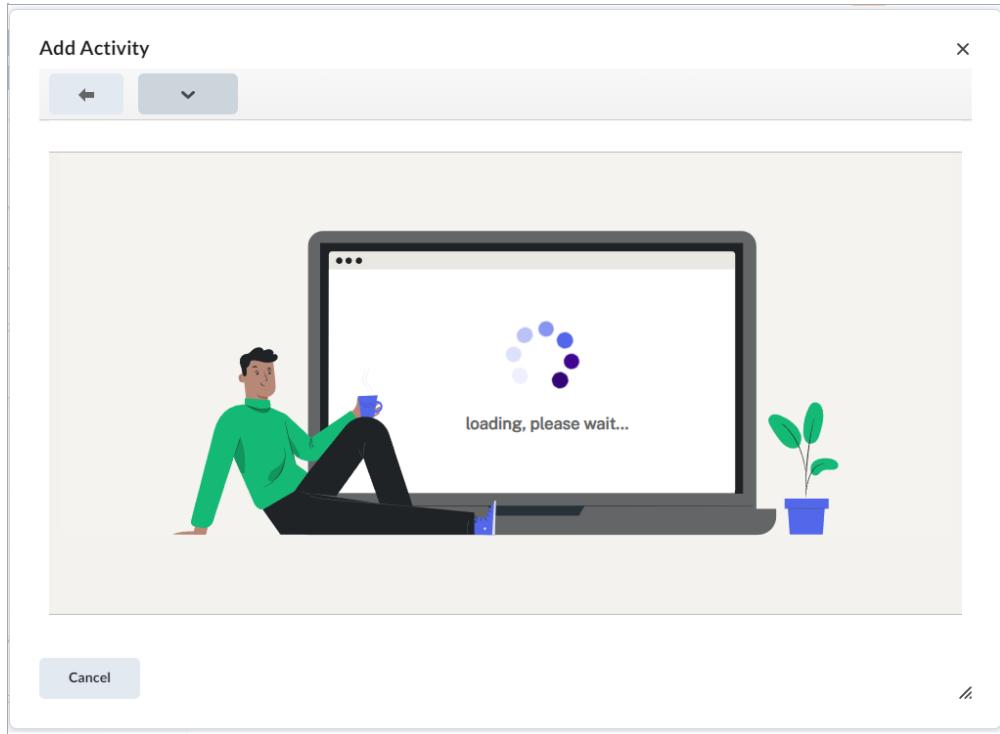

→ Module 2: Research in Psychology

Clicking Add Course will add the selected content for this Lumen course to your LMS

Cancel **Add Course**

5. This window will automatically close once all the content has loaded. Note that grade items are automatically created in the d2l gradebook once all Lumen One content is loaded into

D2L. Faculty will need to organize the grade items in the appropriate categories if needed.

6. From time-to-time Lumen One may release additional content such as additional learning modules or course-level resources after the initial set up. To add these optional additional resources to your D2L course, you will need to follow the steps outlined in **Steps 1 - 3**.

NOTE: Before you begin to add additional content to your D2L course, faculty should exercise caution not to add content that is already in the course. Ensure that content that is already in the D2L course is not checked marked when selecting additional resources. This can create conflicts with the D2L gradebook by creating duplicate grade items.

Support

If you experienced any issues while importing your course materials, please submit a support request to Lumen using this form <https://support.lumenlearning.com/kb-tickets/new> with a screenshot of the issue. You can also chat with Lumen One support by clicking the chat icon on the bottom right-hand side of the window, or email their support team at support@lumenlearning.com.
