

# Add Lumen One to Your Course

Last Modified on 02/03/2026 11:19 am CST

**Online Services** does not have access to your **Lumen One** account. For integration issues or questions, please contact [Lumen One Support \(https://support.lumenlearning.com/lumen-one-support-request\)](https://support.lumenlearning.com/lumen-one-support-request).

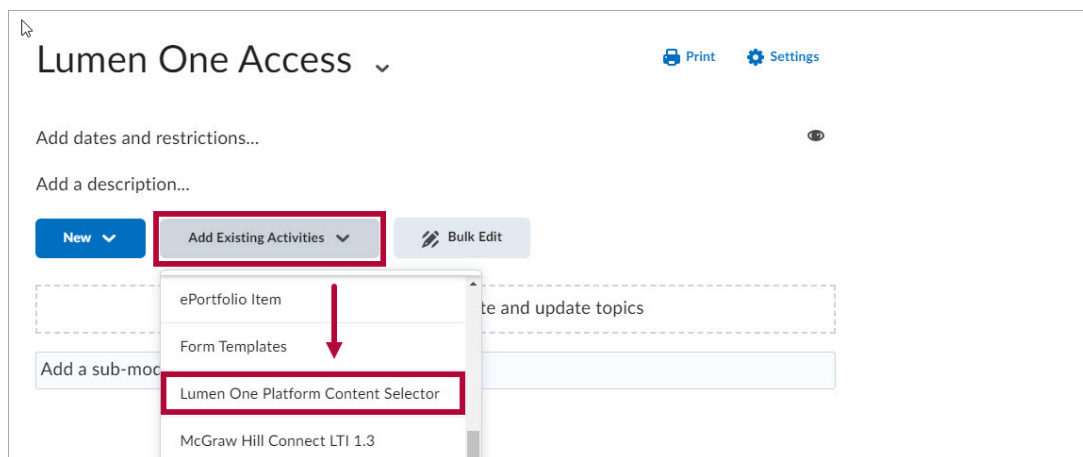

**Lumen One** is a digital learning platform that provides faculty with ready-made course content that can be integrated directly into D2L. This article covers how to request the integration and add **Lumen One** content to your D2L course.

## Getting Your Course Set Up

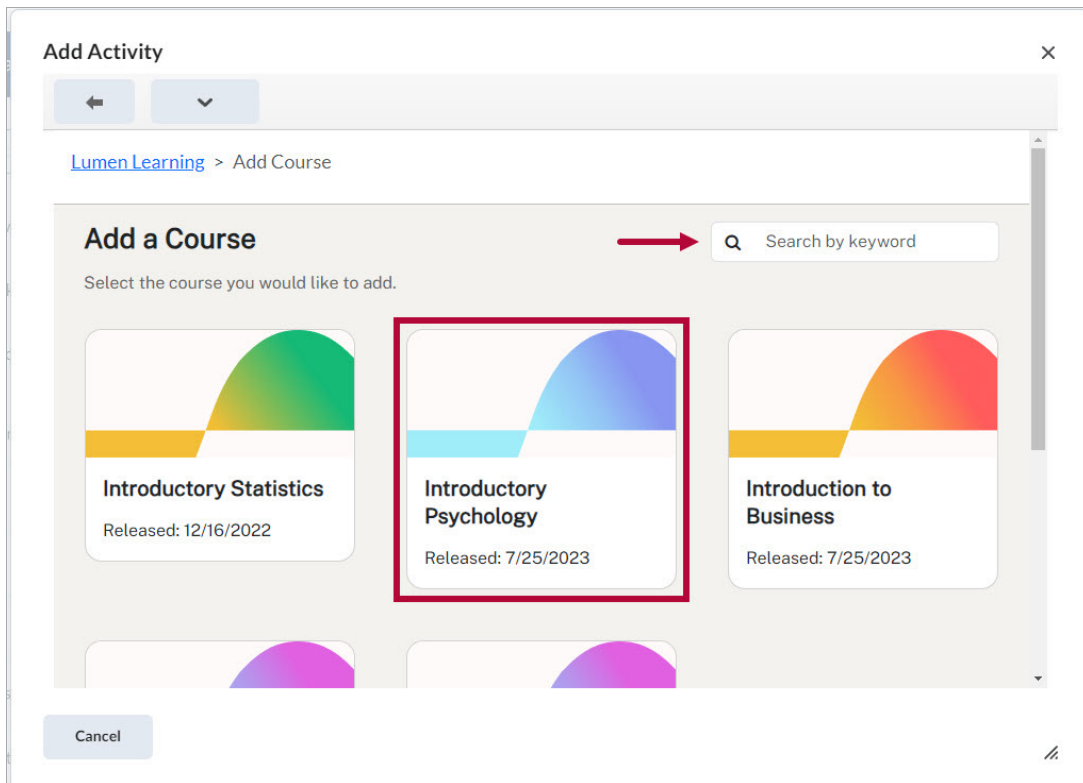

1. Send an email to [VTAC@lonestar.edu](mailto:VTAC@lonestar.edu) ().
2. Include a list of the courses, complete with section numbers and terms, in which you want to use **Lumen One**.

## Adding Lumen One to Your Course Content Module

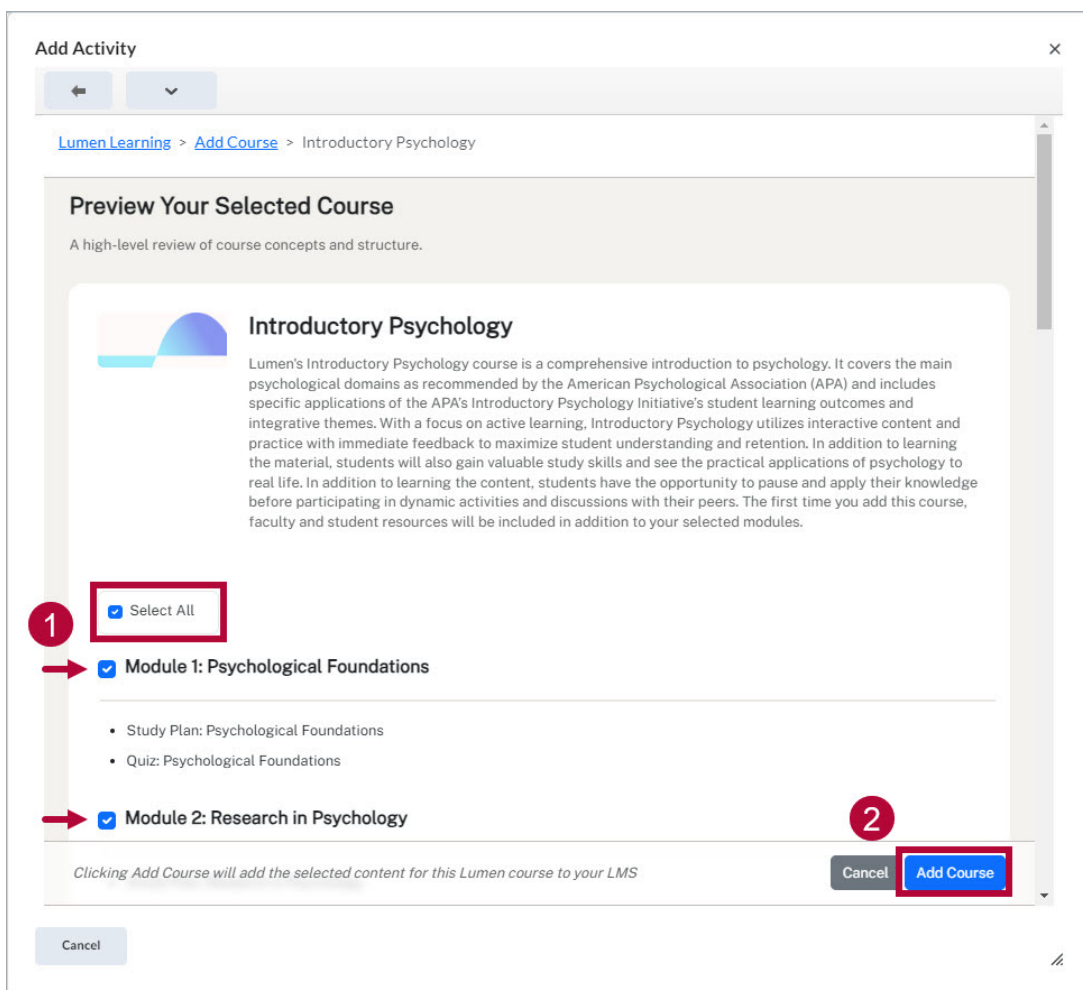

1. Go to **[Content]** and select the module where you want to insert the **Lumen One** integration. For example, add a module and give it a name such as *Lumen One Access*.
2. In your new module, click on **[Add Existing Activities]**, then select **[Lumen One Platform Content Selector]**.

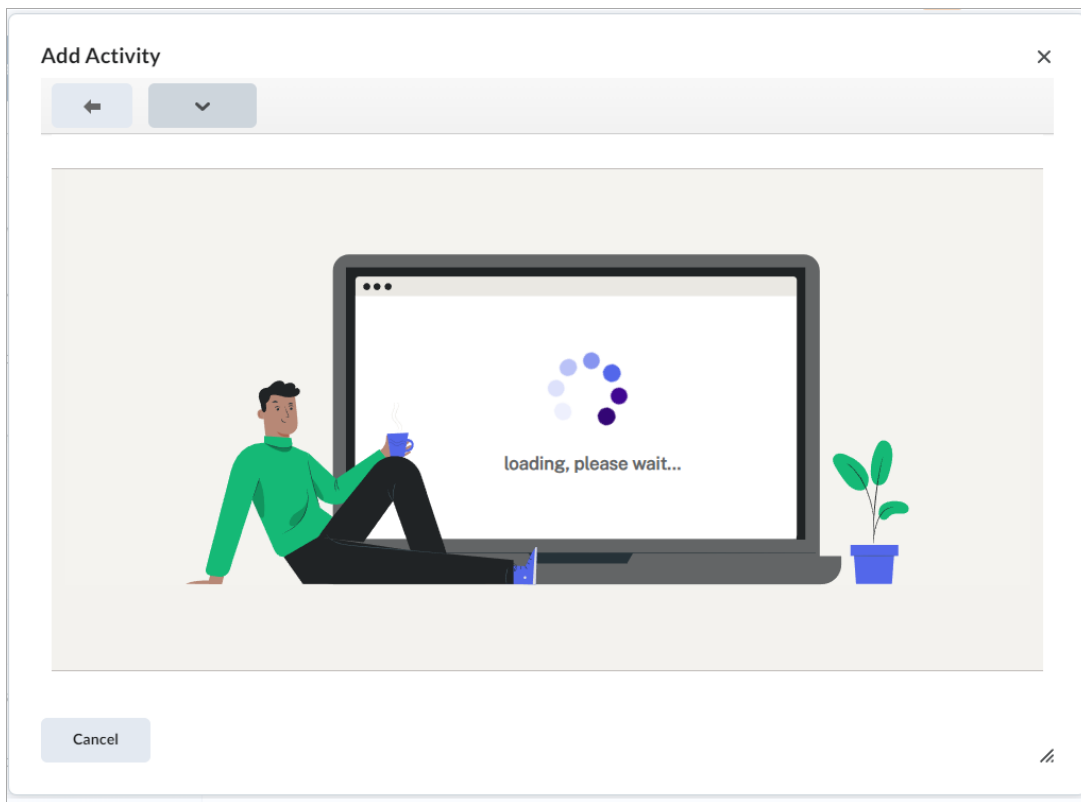

3. In the search box, enter the title for the course or scroll down the list of courses to select the desired course.

4. By default, all content modules from the selected course in **Lumen One** are selected. Ensure that all content modules are checked before clicking the **[Add Course]** button.

- This window will automatically close once all the content has loaded. Grade items are automatically created in the D2L gradebook once all **Lumen One** content is loaded. Faculty will need to organize the grade items into the appropriate categories if needed.

- From time to time, **Lumen One** may release additional content such as new learning modules or course-level resources after the initial setup. To add these optional resources to your D2L course, follow **Steps 1 through 3** above.

**NOTE:** Before adding additional content to your D2L course, exercise caution not to add content that is already in the course. Ensure that content already in D2L is not checked when selecting additional resources, as this can create duplicate grade items and conflicts in the D2L gradebook.

## Support

If you experience any issues while importing your course materials, please submit a support request to **Lumen** at <https://support.lumenlearning.com/kb-tickets/new> with a screenshot of the issue. You can also chat with **Lumen One** support by clicking the chat icon on the bottom right of the window, or email their support team at [support@lumenlearning.com](mailto:support@lumenlearning.com) ().
