# Chromebooks, LockDown Browser & Website Whitelisting for ISDs

Last Modified on 06/09/2025 2:40 pm CDT

## Respondus LockDown Browser for Chromebooks and Windows Devices

As an **ISD Testing Center Manager/Admin**, depending on which device your ISD uses, you may need one or both of the following:

- For **Managed Windows** devices: The **ZIP file**, which contains the MSI installer.
- For **Managed Chromebooks**: The **Google Chrome Extension ID** to update the app/extension being pushed out to your ISDs Chromebooks. An *Admin guide to setup Respondus LDB* with instructions will also be provided upon request.

  For either of these needs, please email VTAC ().

**NOTE:** If you have questions regarding which version of **LockDown Browser (LDB)** you need for Chromebooks in your testing centers, please email your inquiries to VTAC@lonestar.edu ().

## Website Whitelisting

For **ISDs** using centrally managed devices or network firewalls, you may need to whitelist certain websites to ensure students can access videos on their school-owned devices. Please note that this list is not exhaustive and should not be treated as a complete or final list of domains to allow.
