

# Migrate Student Submission Data Between Courses

Last Modified on 04/25/2026 3:32 pm CDT

In the event that you may have to move to a another course (Destination Course) after the students have already submitted data in a course (Origin Course), you will have to first preserve all the student submission data. This article will go over the steps on how to back up student submission data and files. This would normally include submissions in **Assignments**, **Quizzes**, and **Discussion posts**.

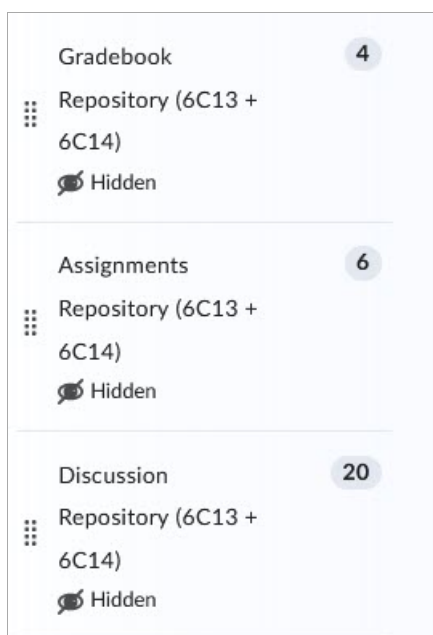

## Packaging the Student Submission Files

There are three major components to manually back up: **Gradebook**, **Assignments**, and **Discussions**.

You want to first create three Content Modules to house your backup files.

For this example, I have named the modules **Gradebook Repository**, **Assignments Repository**, and **Discussions Repository**. These will be the destinations of your student submission data.

**NOTE:** We currently do not have a process regarding backing up **Quizzes**.

## Gradebook

1. Refer to [this article \(https://vtac.lonestar.edu/help/a177\)](https://vtac.lonestar.edu/help/a177) for the steps on how to backup the **Gradebook**.
2. Upload the **CSV** file into the **Gradebook Repository** module that you created earlier.

In this example I have uploaded both the **CSV** and the **Excel** file of the Gradebook, on two different dates.

Gradebook Repository (6C13 + 6C14) Print Settings

▼

Add dates and restrictions... 🔊

This module includes the gradebook for the merged course as of **February 14, 2023**. It includes all student grades from both 6C13 and 6C14 sections.

## Assignments

The following steps will need to be completed for *each* individual Assignment folder.

1. From the **Assignment Folders** page, click on the **[Name of the Assignment Folder]** you're going to back up.  
You can also click the drop-down arrow next to the folder title and click **[View Submissions]**.

<p>1</p> <p>Study Buddy</p> <p>There may be times when you would like to ask one of your classmates a question about class. Here is the place to do so. Use this board to post comments, ask questions, and reply to your peers. I will moderate this board at least once a week, but it must be clear that any questions or comments meant for me (the instructor) or that you want to be private, should be emailed; you will get a much quicker response. You should subscribe to this board for regular updates.</p> <p>Though this board is not part of a graded, structured discussion, rules of respect and netiquette still apply. If anyone posts blatant inflammatory comments, I will delete the comments and create an incident report that will be given to the appropriate academic authorities.</p>	22	28 (22)

2. Check the **[Select All]** checkbox at the corner of the table → Click **[Print]**.

3. Make sure all student posts for this topic are included in the popup window. Click **[Print]** on the popup window.

4. Within the **Print window**, select **[Save to PDF]**. Click **[Save]** at the bottom right corner of the window.  
Save the PDF to your computer for now.

The screenshot shows a web browser window displaying a discussion board for 'ENGL-1301 6C13 1 Composition & Rhetoric I - LSCS'. The page title is 'ENGL-1301 6C13 1 Composition & Rhetoric I Non-Graded Discussions - Study Buddy'. The main text explains the purpose of the board and includes a warning about respectful communication. Below the text are four unread messages from users: Karla Ramirez, study (Alyssa Black), study buddy (Lana Vongsombath), and Study buddy (Sparkle Diggins). A print menu is overlaid on the right side of the page. A red circle with the number '1' points to the 'Destination' dropdown menu, which is currently set to 'Save to PDF'. A second red circle with the number '2' points to the 'Save' button at the bottom of the print menu. The print menu also shows options for Orientation (Portrait/Landscape), Pages (All), Color mode (Color), and More settings.

5. **Upload the PDF files** back into your **Discussion Repository** module through **[New]** → **[Upload Files]**. *You will need to do this for each individual Discussion Topic.* The end result should look similar to the following screenshot:

## Import Content Modules into Destination Course

Now that you have packaged up all the student submission data, its time to move it over to the Destination Course. Follow the instructions at [Copy Course Components \(Advanced\)](https://vtac.lonestar.edu/help/copy-course-components-advanced) (<https://vtac.lonestar.edu/help/copy-course-components-advanced>) and import these repository modules into your new Destination Course.
