

Print a Quiz

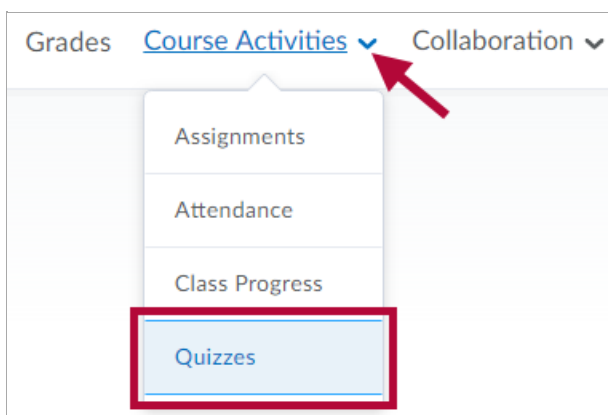

Last Modified on 09/26/2025 3:07 pm CDT

You can print a **Quiz** from **D2L** in order to deliver the quiz to students in person. When printing, you can create multiple randomized versions of the quiz, customize the information you would like to be on the quiz, and you can also print an **Answer Key**. Printed quizzes support all D2L quiz question types, shuffling and randomization options, and question pools.

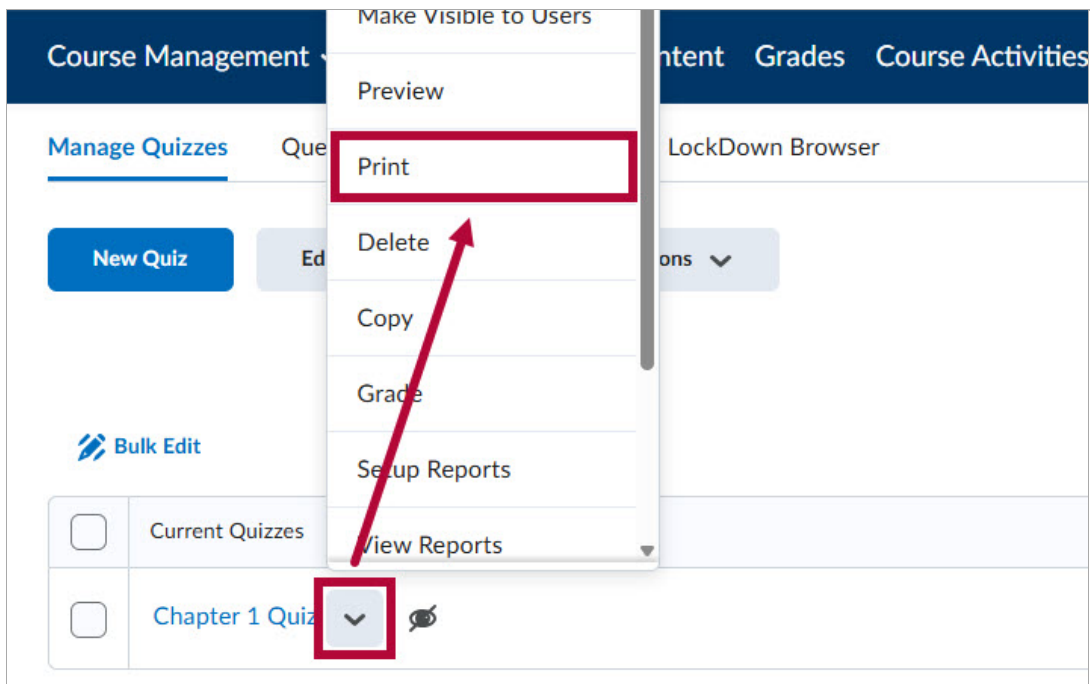

Show Video Walkthrough

Printing a Quiz in D2L

1. From the **Navbar** in your D2L course, click **[Course Activities]**, and then select **[Quizzes]**.

2. Click the **[dropdown arrow]** next to the quiz you want to print, then click **[Print]**.

3. You will be taken to the **Print Quiz** page. To print the Quiz, click the **[Print]** button at the bottom of the page.

Print Quiz - Chapter 1 Quiz

Chapter 1 Quiz

1. Write the full number from the following scientific notation. /1
 4.0400×10^{-4}
☐ 0.000404
☐ 40400
☐ 0.0004040
☐ 0.00040400
☐ 0.0004

2. Calculate the following and choose the answer with correct significant figures. /1
 $273.152 + 25 + 3.2$
☐ 301.35
☐ 300
☐ 301.4
☐ 301.352
☐ 301

1. Randomization

A. Number of Versions

- The number you enter under **Number of Versions** will determine the number of separate randomized versions of the quiz generated. On the left you will see a tab for each version, labeled **[Version A, B, C, etc...]** (If you set the **Number of Versions** to 1, there will be no tabs as there is only a single version of the quiz to view). You can click these tabs to switch between the different versions of the quiz.

The screenshot shows the 'Print Quiz - Chapter 1 Quiz' interface. At the top, there are tabs for 'Version A', 'Version B', and 'Version C'. On the right side, there is a 'Randomization' panel with a 'Number of Versions' input field set to '3'. A red box highlights the 'Number of Versions' field and the 'New Version A' button below it.

- Each version of the quiz must be printed separately. The **[Print]** button will change to reflect which version you are looking at, and will print that version if clicked.

The screenshot shows a blue button with the text 'Print Version A' in white.

B. [New Randomization]

- You can re-randomize the quiz by clicking the **[New Randomization]** button. Like the **[Print]** button, this button will contextually adjust itself to the version of the quiz you are currently viewing, if you have multiple versions of the quiz.

The image shows two side-by-side screenshots of the 'Randomization' panel. The left panel shows 'Number of Versions' set to '1' and a button labeled 'New Randomization'. The right panel shows 'Number of Versions' set to '3' and a button labeled 'New Version A'. Both buttons are highlighted with red boxes.

2. Formatting

- A. **[Name field]** - This will add a line for the student to enter their name at the top of the quiz.

The screenshot shows the quiz interface. At the top, there is a 'Name:' field with a red arrow pointing to it. Below this is a question: '1. Write the full number from the following scientific notation. /1'. The question text is '4.0400 x 10^-4' and the options are '0.0004' and '0.00004'. On the right side, there is a 'Formatting' panel with a 'Name field' checkbox checked and highlighted with a red box. Other options include 'Student ID field' and 'Date field'.

- B. **[Student ID field]** - This will add a line for the student to enter their Student ID at

the top of the quiz.

Student ID: _____

1. Write the full number from the following scientific notation. /1

4.0400×10^{-4}

☐ 0.0004

Formatting

Include

☐ Name field

☒ Student ID field

☐ Date field

C. **[Date field]** - This will add a line for the student to enter the date at the top of the quiz.

Date: _____

1. Write the full number from the following scientific notation. /1

4.0400×10^{-4}

☐ 0.0004

Formatting

Include

☐ Name field

☐ Student ID field

☒ Date field

- If you choose multiple fields, they will stack horizontally with each other.

Name: _____ Student ID: _____ Date: _____

1. Write the full number from the following scientific notation. /1

4.0400×10^{-4}

☐ 0.0004

Formatting

Include

☒ Name field

☒ Student ID field

☒ Date field

3. Answer Key

- Clicking **[Show correct answers]** will turn the quiz into an **Answer Key**. The correct answer for each question will be indicated, allowing you to print an answer key in addition to the quiz. If you are making multiple versions of the quiz, each version will have a separate answer key which will need to be printed separately for each quiz version. Printing is the same as printing a quiz.

ANSWER KEY

Chapter 1 Quiz

Name: _____ Student ID: _____ Date: _____

1. Write the full number from the following scientific notation. /1

4.0400×10^{-4}

☐ 0.0004

☒ 0.00040400

☐ 0.000404

☐ 0.0004040

☐ 40400

2. Calculate the following and choose the answer with correct significant figures. /1

$273.152 + 25 + 3.2$

☒ 301
